Summit unity on defence and world economy

The first full day of the Williamsburg summit yesterday underlined the main aim of the eight Western leaders to resolve their

differences amicably.

Economic policies were the subject of the first meeting after a "prayer for peace" service at the local church. President

Mrs Thatcher, who is due to resume her election campaign in London this morning, had a series of private bilateral meetings

West relations were discussed.

and arged Mr Reagan to modify a Bill that would toughen East-West trade sanctions.

western industrialized nations range missiles in Western opened their discussions yester- Europe. day with a demonstration of

reviewing during the three-day Their statements made it clear that they wish to show the world, and the Soviet block in particular, that they can resolve their differences harmoniously and at the same time take initiatives that will ensure a

sustained recovery. Fears that the summit could be marred by confrontation between the French and Americans, as occurred at last year's summit in Versailles, were quickly dispelled by President Mitterrand. In a most concili-atory manner the French President explained to President Reagan during a private meeting before the conference that his call for a new Bretton Woods-style conference to re-

power by accident." The Conservatives' private polls, it was said last night, show in fact that the Alliance has remained at 20 per cent support for the last 10 days while the Conservatives had moved up from the 40 to 45 per cent support band to the 45 to 50 per cent band, and Labour had moved down from the 35 to 40 per cent band to the 30 to 35

'Super secrets' for Cabinet eyes only

By Peter Hennessy

The Prime Minister has introduced a new "super secret" classification and a special handling procedure for the most sensative Cabinet documents in an effort to combat Whitehall

Such paprs will carry boldly displayed the initials "CMO", believed to stand for "Cabinet Ministers Only". Each department is restricted to two copies, one of which must remain in the Secretary of State's private office.

Sîr Robert Armstrong: new secrecy drill

Top officials were informed of the system at a recent meeting of permanent sec-retaries, one of a regular series in the Cabinet Office. Sir Robert Armstrong, Secretary of the Cabinet, said its use would be restricted to a very small porportion of Cabinet papers, in addition to the long-standing arrangement of "confidential annexes" for Cabinet minutes intended to have a very limited circulation. No details of the new secrecy drill have been

Furture historians may be disappointed by the quality of CMO" archives when they start to appear at the Public Record Offices under the 30year rule in 2014.

One item now available from the files of top secret confiden-tial annexes for 1947 is a discussion of what kind of present the Cabinet could purchase for Princess Elizabeth (as the Queen was then) and the Duke of Edinburgh on the

Israeli reconnaisance jets flew over the Syrian-occupied north-ern Bekaa valley all morning yesterday as more Israeli troops and armour moved across the frontier into Lehanon. Drug tests on jobless defended

A doctor who runs a research aboratory where about 60 per cent of volunteers recruited to test drugs are unemployed has explained why he believes he is

acting ethically. Dr Mansel Aylward, head of research at the Simbec Labora-tory, in Merthyr Tydfil, Mid in his research into arthritis,

bronchitis, the menopause and cardiac disorders. They have been paid from £10 for a day's session to £280 for a six-week experimental period to test existing drugs as well as new drugs that have been previously tried out on humans but which are not yet considered safe for general use.

Dr Aylward said: "I think it ethical because I do not consider them as unemployed people. I consider them as volunteers.

"I do not ask them, 'Are you inemployed' when they come here. It is true that people who are unemployed are more likely to volunteer because they have the time to spare and because they are attracted by the money.

But we are providing a place where people can go in these

"We have about 500 volunteers, of whom about 60 per cent are unemployed, but there will never be enough volunteers. Before we had the increase I was the most punctured person in the clinic. and that I consider to be unethical."

Stamp duty interest lost because of mail backlog By Frances Gibb, Legal Affairs Correspondent

stamp duty because of huge backlogs of unopened mail at

stamp offices.
Solicitors are complaining that the Bristol Stamp Office is so understaffed that more than eight days post has accumu-lated. Delays at the Adjucation Stamp Office at Worthing can run to several months.

Mr Peter Letts, Secretary of

the Association of South West-ern Law Societies, said: "The situation is ridiculous. I have had complaints since Christmas from members of various law societies from all over the south-west who come to me in

desperation."
Each day's post at the Bristol Stamp Office, he said, represented on average £250,000 of tic will therefore show that the Government is losing the equivalent of £500 to £600 a day in lost interest on the sums

involved." He said the Government must also be losing interest through delays at the Worthing office, which deals with all stamp adjudications. Delays there can run to several months. 4 He sent one case in September

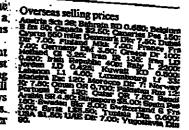

The Government may be and received a written rely only losing large sums in interest on this month. The matter is still unresolved.

An Inland Revenue spokesman said the department was aware of the delays, there had been a great increase in the flow of traffic, mainly due to property conveyancing.
In the Briston office some relief staff had been drafted in,

but the reduction in some areas was slow and it was not possible to say when matters would be back to normal.

Clearance plan 'would blight Norfolk Broads'

A plan to buildoze more than a hundred holiday homes is the Norfolk Broads to "restore the area to its natural would blight the beauty" region for decades it was claimed yesterday.

The clearance campaign is one option being considered by the Broads authority after publication of a consultant's report in March. It has provoked protests from residents of the holiday homes along the river Thurne, who were not consulted.

The residents, in their report published yesterday, said the clearance would destroy £2m of holiday investments, cause "irreparable personal loss" for 200 families, and mean fewer local jobs. The authority is also criticized for using procedures which do not allow the tenant's right of appeal

New powers urged for police to hold glue-sniffers

By Frances Gibb, Legal Affairs Correspo

detain young people found glue- not prevent reoffending. suffing in public places, in police stations or drying out centres, is being urged by the Justices' Clerks' Society.

In a paper to the Department of Health and Social Security, which has sought advice on solvent abuse, the society outlines proposals to deal with all kinds of intoxication on the streets, including glue-sniffing.

The society, of 350 chief legal advisers to magistrates in England and Wales, says: "Unlike drink and drugs, there seems to be no feasible way of controlling by statute the supply of solvent".

The only area of possible control, it says, is the conduct of the solvent abuser. As the result of solvent abuse is so similar to that of drink and drug abuse, a common scheme of prevention In a draft Bill the society

proposes a new power for police to detain anyone intoxicated from any cause in a public place. Children could be held for drinking, taking drugs, or glue-sniffing even if not intoxi-

The offences of drunkenness or being drunk and disorderly would be repealed. These offences are increasingly criticized the society says. Fines are-circumstances warranted it.

A new power for police to irrevelant to alcoholism, and do

Yet there is a real problem in letting drunken people lie down or stagger around in public places where they may injure themselves or others, cause accidents, be a health hazard, or the subject of abuse by passers-

The society says that some police forces, such as Dorset, have stopped bringing charges of simple drunkenness. Instead the offender is arrested and detained until sober, when he is released without charge. But there is no such power in relation to juveniles found glue-

The society proposes that they should be subject to similar detention powers so that they can be held long enough to enable inquiries to be made. "Such a power would be justified on the ground that glue-sniffing is a potentially dangerouse practice and when carried out in public is a bad example to other children, as well as being objectionable to the public at large", it says.

Under the Bill, for which the society is seeking sponsorship after the election, adults would be held until sober, children until seen by a social worker or claimed by their parents. Long-er detention would be possible if a child was intoxicated or the

How the public got the best seats for the ceremony

World Conservation Strategy: 1

Farm that flowers without chemicals

Strategy is a survival plan for nature in a world dominated by the human race. The Prince of Vales will introduce the official British response to it on June 8. Hugh Clayton, Environment Correspondent, explains in the first of three articles how it is practised in the Countryside. Bill Elliott has lived in the

same Wiltshire farmhouse for all but three months of his 50 cars. When his landlord died four years ago the new owner was keen for him to stay.

Like millions of farmers across the world, Mr Ellion has little time to examine the World Conservation Strategy and its advice about enabling wildlife to survive amid agriculture. His windswept downland estate, now dotted with buttercups, is classified under the strategy as 'permanent pasture", a type of usage that occupies almost a quarter of the land surface of

The strategy, an appeal 10 governments, was issued by

environment programme. It calls on governments to conserve nature before it is squeezed out of existence by man-made pressures.

The strategy defines permanent pasture as "land used for five years or more for herbaceous forage crops, whether cultivated or wild". Bill Elliott's land fits that definition, with important exception; his landlord estimates that much of his 600 acres has been used in

that way for 1.000 years.
While the neighbours' fields are densely planted with corn down to Mr Elliott's fence, his land is dotted every summer with a rich selection of yellow, red and purple wild flowers. Pink and purple orchids grow in the fields and white ones in the wood. Owls. hares and partridge breed on the farm and butterflies feast on the rich carpet of flowers near the dewpond

Mr Elliott says proudly that much of the land has never treated with chemical

agencies three years ago with fertilizers or sprays. The steep the help of the United Nations down at the end of the farm has down at the end of the farm has escaped the revolution of the past 50 years which has changed much of the grazing downland of England to uniform corn-fields. It is definitely the two world wars that have saved it", he explained.

> His land in next to the military complex that centres on Salisbury Plain, and lies a short drive from Bulford camp and Tidworth garrison. In both world wars the land was commandeered for infantry and artillery training while all the neighbouring farmers were told

to dig and plough for victory.
"Soil is a crucial life-support
system", the World Conservalion Strategy states. Mr Elliott is convinced that his animals are healthier on their diet of wild grasses and flowers than they would be on grass from one of the commercial seed mixtures. It is almost as precious to botanists as the monument of Stonehenge near by is to archaeologists. The land has not survived by

4,000 official sites of special scientific interest and one of only 171 national nature reserves. Its owner is the Nature Conservancy Council, the statutory agency which admisisters wildlife law. Mr Ellion's home is in effect Quango Farm.

It represents on the ground almost everything that the World Conservation Strategy has demanded through countless documents, maps and

If the land was sold it would be covered with infant shoots of grain by Christmas.

The 500 pages of reports in the British response to the strategy will provide the next Government with a blueprint for implementing the strategy all over the country, and not just on carefully safeguarded morsels such as Quango Farm. Professor Timothy O'Riordan. of the School of Environmental Studies at the University of East Anglia, wrote the countryside report in the British response. Tomorrow: The inner city

Support for two-year degrees

Strong support for the idea of two-year degrees in place of the present three-year minimum has come from the Council for National Academic Awards which approves all courses in polytechnics and other higher education colleges outside the universities.

The council envisages a range of new qualifications below the level of the three-year honours degree, some of which would be more suitable for the growing number of part-time students. A new paper from the

council, to be circulated to the 130 colleges and polytechnics offering degrees for which it is responsible, is strikingly close in its recommendations to the conclusions of the Leverhulme inquiry into the future of higher education, which reported on

Leverhulme proposes that more students should be studying part-time and more should consider degree courses slightly below the present pattern of three years' full-time study. It also considers that more stu-dents should be permitted to interrupt their studies for example to work for a period. and continue later. In that way more students might "work through college" along Ameri-

The council proposes revival of the qualification known as the Diploma in Higher Education. It has been available for some years but has not won support either in colleges or to employers. Idealthe council says, that diploma would be a useful qualification in itself or serve as a good introduction to a full three-years honours degree.

Engine revived

A lorry engine which spent three months in the sea after it sank with the ferry European Gateway off Harwich last September started the first time when brought ashore. Bedford 500 engine needed a new starter motor and new oil.

Dundee East

Jenkins image under pressure

Mr Roy Jenkins, leader of the Alliance, now has 10 days to get his electoral act together after the strong criticism he encountered yesterday at Mr David Steel's home at Ettrick Bridge, Scotland.

He stood accused, as the Alliance's choice for Prime Minister, of being primarily responsible for an indifferent performance in the opinion polls. An apturn had been detected, but there is a long way to go.

There is little doubt that Mr Jenkins is in urgent need of what his Welsh compatriot would call "hwyl" – while loosely translated means oomph. There have been flashes of

muted extroversion and enthusiasm, such as in Kent, and even more so when he returned to Glasgow last Friday to the scene of his election triumph 16 months go at Hillhead.

In Kent, the "battle bus" -now ditched in order to speed up the campaign - arrived in one town on a beautiful morning to the strains of the theme from Chariots of Fire and a party worker who declaimed that only the social democrats could bring the sun to Sittingbourne High Street. queue to take a five-minute ride (someone else paid) and then dived into another queue repertoir of gestures are drawn upon, but they never tips over into theatricality. The style is presidential, as befits the former head of the European at the other end with something approaching animation. But thus far in the campaign, his politics and method of electioneering have been characterised by moderation of such a militant and extreme nature as to be open to the charge of impoter Hands are shaken, but backs

Mr Jenkins, Dr Owen and Mr Steel at yesterday's

attentions to Glasgow, we arrived on the afternoon of time we got to Rochdale and an ample welcome from Mr Cyril Smith, the shops were closing and the few shoppers left were scuttling homewards.

There have been other endearing organization prob-lems. The "battle bas" had every appearance of semi-moderaity, but in fact was a boneshaker whose equipment telephone, coffee machine, photocopier - all steadfastly refused to work.

But here has been some awareness of the importance of public-relations - the dreaded claret had been banned from the bus in favour of Rioja and Chianti – but journalists seem to be regarded as a necessary appeadage rather than poten-tilly impressionable young people with immediate access to millions of people.

For the media, while after all is the main conduit to the electorate, the experience has been largely existentialist. Questions are answered with impeccable politeness, but one is left feeling afterwards that the query and answer were

over four minutes, and fiery. He He sat down to a second standing ovation, led on the platform by Mr Scargill. There were many Wall supporters in the audiance who displayed

banners from the balcony saying "Vote Pat Wall, Labour. Socialism, the only hope for the future". Mr Foot spoke about the achievments of the candidates on the platform, there was a brief mention of Mr Scargill,

then he turned to Mr Wall to deliver a warning as to his future conduct. The key part was: "When we are elected as Labour MPs we

have to give a fresh undertak-ing a fresh obligation to uphold the Yorkshire left, who sent the went to the podium. He the constitution of the Labour audience home happy with received a rapturous standing Party, which is a very old and very important element of the way we do our business".

CONSTITUENCY PROFILE

Testing time for nationalists

G Wilson SNP C Bowman Lab Mrs B Vanghan C S Rottger L/All

Labour.

The city of Dundee has a long tradition of political independence and voting for individuals rather than party labels. Anong those who have represented it in Parliament this century have been Winston Churchill, Michael Foot's elder brother, Dingle (both elected Liberals), the Labour maverick John Strachey and a prohibitionist who stood on an antidrink platform.

Gordon Wilson, who is defending Dundee East for the Scottish Nationalist Party, has been the most recent beneficiary of this tradition. Although the nationalists have never done well in local elections, he has so far held on to the seat that he won in February, 1974, largely through his personal popularity. This time, however, he is likely to face his severest test at the

Mr Wilson, an affable, articulate and impressively well-informed solicitor, who is chairman of the SNP, will be standing on his record as a constituency MP who has done much to promote the image and prosperity of Dundee by helping to get an enterprise zone established in the city and to attract big development projects. He would like to expand the city's docks by introducing a regular passenger and freight service to Germany.

He adopted a vigerous,

Mr Sumberg: "Labour voters

fear the left"

A gambler's nightmare

CONSTITUENCY PROFILE Bury South

D. Boden (Lab) K. Evans (SDP/All) D. Sumberg (C)

The most adventurous of gamblers would shy away from betting on the Bury South result. a three-horse race in which even the jockeys have little idea of their likely placing at the finishing post.

The new Lancashire constitu-ency consists of three areas; Prestwich, Whitefield and Radcliffe. That they are culled from two previously held Labour seats should make Derek Boden, the 46-year-old Labour candidate, odds-on favourite. But it doesn't.

At the local elections earlier this month Labour won only one new seat on Bury Metropolitan Borough Council, still leaving the Tories in control with a comfortable majority of six. Labour still fared better than the SDP and Liberals who between them fielded 16 candidates and got nowhere.

It is impossible to analyse any voting pattern in the constituency. Radcliffe is a small but hercely independent town with a shopping centre. paper mills and engineering works. Both Prestwich and Whitefield are mainly dormitory areas with over half their residents travelling to work in Manchester and Salford, nearby. More than 60 per cent of homes are privately owned.

As in most North-west constituencies unemployment is the key issue. In Bury South it runs at 14 per cent, with only he had won a Labour seat on one in eight school leavers able. Greater Manchester Council to find a job. There has been an and four years earlier had

TUC position papers on the

subject suggest that Labour should return to the pre-1979 definition of a trade dispute "to ensure in principle that any dispute between employers and emplyees is properly protected again enjoy immunity from civil actions for damages in respect of employment".

As may be expected, the SDP-Liberal Alliance takes a position somewhere midway between the major parties. the policies are only a milder version of Tory plans.

The Alliance ties its pro-posals for reforming industrial relations to the introduction of partnership in industry, arguing that employee democracy can be extended only if trade unions are made "genuinely representative of their members".

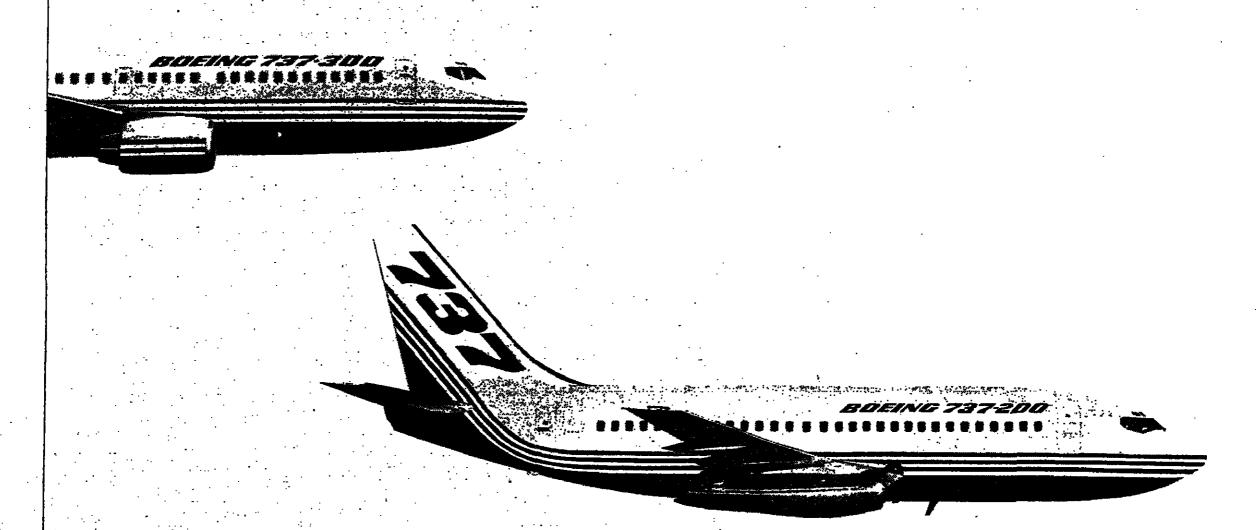

Like the Conservatives, therfore, they would legislate to provide for compulsory secret ballots for the election of trade union national executives, and in some cases, general secretaries. There would also be "trigger ballots" it 10 per cent of workers wanted to vote before going on strike.

Compulsory arbitration would be introduced in essential public services, and the preentry closed shop would be banned by law. However, the Alliance argues the case for an Employees' Charter

Tomorrow: The bomb

FLY THE LEADER.

Air apparent.

The most popular jetliner in the U.K. today is the Boeing 737. Seven U.K. airlines will carry 12 million passengers in 1983 alone. Forty million have flown this fleet since the first 737 was introduced. Over this period of time the 737 has compiled the best on-time record of any major fleet. Soon the even larger 737-300, with greater fuel efficiencies, more passenger comfort and even quieter performance characteristics will be available. It's one more way Boeing is working to keep air fares one of the world's best travel values.

The Williamsburg summit

Soviet missile threat seen as attempt to influence West Europe

With an eye on the Western summit in Williamsburg, Moscow has issued its clearest warning so far that if new American missiles are deployed in Europe it will respond by stationing rockets of its own in Eastern Europe and will threa-ten the territory of the United A Government statement in can coast.

Pravale on Saturday said that because of the "growing threat to the security of the Soviet Union and its allies" Moscow would have to strengthen its defences and develop "new Strategic systems".

The Soviet Union wished to warn Nato "with utter clarity," the statement went on, that if the deployment of Cruise and Pershing 2 missiles went ahead, it would take "timely and effective measures" in response.

These included lifting the moratorium on further deployment of SS20s in European Russia, declared by the late President Brezhnev last year, and providing a "counter balance" to American forwardbased systems "in arrangement with other Warsaw Pact coun-

Yesterday. Pravda claimed that the United States was using the Williamsburg summit to "lasso" West Germany and fence it off from its Eastern Hadde that Washington would like its allies to be dependent on oil supplies from the Middle East rather than Soviet gas, since this would bind them much closer to American Middle East policy.

Taken at the flood: A Cologne citizen paddling through the city's streets after the Rhine overflowed.

Rhine breaks banks to flood three cities

From Michael Binyon, Bonn

As the mighty River Rhine roared in a brown torrent through leafy streets and gardens, thousands of families moved up to the top floors of flooded houses in Cologne, Bonn and Koblenz, and emergency services were stretched to the limit evacuating the old and handicapped and distributing food to marooned houses.

With the Rhine already 30ft above normal and still rising after almost a week of continuous rain, Rhinelanders were calculating the costs of the damage which the third flood this year - and the worst since the war - has brought to towns and agriculture from Switzerland to Holland.

The old city of Cologne stood in up to 5ft of water. Trams had to be stopped, streets barricaded against a huge crowd of sightseers, and sandbags piled up in attempts to hold back

In Bonn, the river swirled round one

side of parliament and lapped close to the offices of Bundestag members. Firemen delivered over 17,000 sandbags to communities attempting to dam the flood and keep the water out of their basements and cellers.

The swift current of the swollen river swept away caravans, chalets and trees from low-lying areas, washed awawy earth and plants from gardens and broke through fences and mounds.

Towns in Germany's main wine-

growing districts were particularly badly affected. In Trier the River Mosel reached a record of 10.51 metres above normal, and houses had to to disconnected fron the electric grid. The Mosel also brought severe damage to Bernkastel, and added to the flooding in Koblenz.

The situation eased somewhat on the Upper Rhine, where record floods damaged harbour intallations in Karlsruhe. But prolonged rain on Saturday night led the emergency services lower down the river to revise their forecasts that the torrent would start to abate today. Yesterday the river was still rising at two centimetres

All shipping has been forbidden along virtually the length of the Rhine, trains have had to be diverted from flooded railways and many roads are under water and impassable. Severalpeople have already been drowned in accidents caused by the floods,

The weather forecasters here say the continuous rainfall for the past month is extremely rare. It has led to one of the coldest starts to summer that Germany has known, and threatens to cause huge losses in agriculture and in the wine industry.

● MACON: The River Saone reached its highest level in more than a century yesterday, threatening the Beaujolais winegrowing region

Underworld chiefs in two-wheel escape

Avellino, Italy (AP) - Four leading members of the Camorra underworld organization escaped yesterday from a maximum security prison amid a hail of bullets, using a rope thrown over the wall from outside.

One of them was captured when he fell and broke both legs, but the other three jumped onto a waiting motor cycle and sped off. They are Clemente Perna. Third World casts a shadow

Brussels

The shadow of an uninvited guest was cast across the cosy armchairs in Williamsburg this weekend, where the leaders of seven of the richest and most powerful countries in the non-Communist world have been

It was the shadow of the debt-laden, starving Third World, which was hovering roung the conomic summit in the hope of picking up some crumbs of comfort from the final conclusions. It was a dark shadow. which intruded unpleasantly into all the talk of how to protect the "fragile" recovery from the dangers of inflation. high interest rates and budget

The shadow was dark pre-cisely because of high interest rates, which every county says it wants to lower, but without obvious success. Servicing those debts is not only impoverishing the developing countries further, but is using up most of the money they might have had to buy goods from the industrialized countries.

According to accepted wisdom in the European Commission, charging high interest rates to developing countries is third Lome agreement, due to EEC countries. simply cutting off the nose to spite the face. If the rates do not 1985, would be clouded by past ROME: Thorn, the Commission President, argues, the entire monetary stability of the world could

agricultural produce, known as "Stabex". But "Stabex" has become a bankrupt gesture, incapable of bridging the evergrowing gap between real export ncome and real income needs.

The Lome countries have seen their debts grow from \$6,709 m (£4,190 m) in 1971 to \$41,526 m in 1981. This means that their debt servicing is costing around \$5,000 m a year now, at a time when the World Bank estimates that they will have virtually no growth, and when their agricultural output and export volume are expected

to drop.

This is because of bad management and bad techniques as well as bad weather. It is also because many countries ly plain earlier this month when have tried to grow cash crops the foreign ministers from the like cocoa and coffee, which Lomé countries and from the Latin American countries can grow more competitively. Meanwhile crops which could have fed people, like maize,

Ostrich land Police keen Melbourne voters give warning to Hawke unruffled

From Tony Duboudin, Melbourne

The Labour Government Democrats, Democratic Labour received a sharp reminder at the - plus an independent and two weekend that its honeymoon with the electorate was over when the voters of the Melbourne suburban seat of Bruce reelected a Liberal.MP.

only I per cent to capture Bruce but instead suffered a swing of about 3.5 per cent against it.

Aldred. aged 37, an industrial training executive. He defeated Mrs Heather O'Connor, who conceded defeat on Saturday night after 70,918 of the more

than 81,000 votes cast had been counted. The election was contested by - Liberal, Labour, Australian back

minor party candidates. Bruce has exactly the sort of

electorate that Labour won in March: outer suburban, middle class and in the so-called mortgage belt: It is also exactly the sort of

area that the mini-budget introduced by Mr Paul Keating. Bruce had been held since its the Treasurer, on May 19 has creation as a seat in 1955 by Sir Billy Snedden, a former Liberal tax allowance for mortgage

admitted that the defeat was largely attributable to the minibudget. He said the party had failed to explain its superannuauon tax properly

The victory was a useful morale booster for Mr Andrew Peacock, the Liberal Party leader. He said "The reinvigormost of the mainstream parties ated Liberal Party is on the way

by change From Michael Hornsby The inhabitants of Oudtshoorn still have their beads.

as firmly buried in the sand as the ungainly and ill-tempered birds whose feathers once made their small rural town in

the southern Cape a byword for opulence and easy money.

The wind of change may be blowing, fitfully, in other parts, of South Africa but the good burghers of Oudtshoorn are doing their best to keep it out. The latest threat to Oudtshoom's traditional way of life has loomed up in the shape of Msr Edward Adams, a

mixed-race Coloured, whom. the Vatican has appointed as its;next bishop there.
From his Oudtshoorn base Msr Adams will preside over a diocese covering some 44,000 square miles and including

olaces as far away as Mossel Bay, George, Worcester, Ceres and Carnarvon. He is one of only two non-white Roman Catholic bishops in South Africa.

Mgr Adams has made clear that, after his ordination next month, he intends to move into the bishop's official residence on St Saviour's Street in the heart of a whites-only section of the town.

But Mr S. M. "Seppie" Greeff, the National Party MP who represents Oudtshoom on the Cape provincial council, insists that Mgr Adams must first get a special permit from the G.overnment, exempting him from the provisions of the

Group Areas Act.
Mgr Adams, however, is adamant that the church "will never apply for this permit. A bishop is a bishop for his people and that's that". In Cape Town, his present base, he has in fact lived for some years in a white area without a ermit. Oudtshoorn has been in-

solved in a number of other incidents in recent months. In one, the police were called in when a pary of visiting foreign students were found swimming in the public baths on a

In another cause cellbre, an Indian businessman and his friends were humiliated by being turned out of the restaurant at the nearby Cango Caves, huge limestone caverns which draw thousands of tourists every year.

Ondtshoorn's boom days were before the First World War. The world fashion for ostrich feathers did not survive

pressure on Walesa

Mr Lech Walesa, chairman of the banned Solidarity trade umon organization, today faces L fresh round of interrogation by authorities in Cooks Camid signs that a long-awanet Irial of dissidents will be delayed until after the Pope has visited

Mr Walesa was questioned by the police on Finday and Saturday but refused to answer questions about this former advisers members of the KOR dissident group, who are being investigated under charges of plotting to overthrow the State

by force.

The trial of the five dissidents was expected by both dissidents and some official sources to start at the end of March.

There was a delay to allow the dissidents to study the 47 volumes of evidence against them and to work out their defence, a process which has not been assisted by the poor health of one dissident. Mr Jacek Kuron, and by the calling as witnesses of a number of lawyers who could have been

defence counsel. It now seems that the prosecution which said it had completed its investigations almost six weeks ago – has decided to make supplementary inquiries about the exact nature of advice given to Mr Walesa by

the KOR dissident. This means that the trial is unlikely to begin before the papal visit, removing a potential embarrassment

However, there seems to be no let-up in police actions against underground Solidarity centres. Police have broken up an underground printing shop near the village of Celestynow, outside Warsaw, which was one of the main printing centres for the clandestine Nowa publishing company.

This prints uncensored books political and literary - and poems which enjoys wide circulation in intellectual cireles. The move thus shows that the authorities want to crack down not only on the publication of leaflets and bulletins but also on the very basis of underground culture in Poland. In another development, a Polish military court has, as expected, found Dr Zdislaw Najder guilty of espionage and sentenced him to death in

absentia. Dr Najder, an expert on oseph Conrad, is head of the Polish section of the Americanrun Radio Free Europe, which broadcasts to Poland and which has been accused regularly of trying to destabilize the country.

paper says From Our Own Correspondent Johannesburg Mr Joe Slovo, whom the South African Government believes to be the mastermind

behind most African National Congress (ANC) guerrilla activity inside South Africa. flew to London from his operational case in Mozambique immediately after the Pretoria bomb blast on May 20, it was claimed here yesterday by the Sunday Times newspaper.
The death toll in the explosion, has now risen to 19. bringing to seven the number of

members of the armed forces among the dead. A week after the blast 32 of the injured has not been disclosed. The ANC claimed responsibility for the Pretoria attack, arguing that it was directed at a

military target, the headquarters of the South African Air Force. The black notionalist guerrilla orgainization has, however, denied that it planted the lunchtime bomb which exploded in the centre of Bloemfontein last week causing no casualties. The South African Broadcasting Corporation reported that its Bioemfontein office was telephoned on Friday by an ANC representative in Lesoho claim-

ing responsibility for the blast. The ANC later issued a statment suggesting that the bomb had been planted by South African agents provocuteurs to furnish a pretext for further action against ANC exiles in Lesotho.

THEARTS

Galleries Egyptian revival

Early nineteenth century inkstand smothered in Egyptian motifs

The Inspiration of Egypt

Brighton Museum and Art Gallery

Historical revival in the arts is usually about 10 per cent history and 90 per cent imagination - at least to begin with. Then conscience and selfconsciousness take over, and fun and fantasy are replaced, as often as not, by educational zeal. To judge by Brighton's latest summer show. The Inspiration of Egypt (until July 17), the Egyptian Revival in Britain ran a more erratic course between these two extremes than, say, the Gothic Revival or the Greek Revival, though sometimes the same people were involved, such as Thomas Hope, Neo-Classicist par excellence, who also pro-duced some of those Egyptian interiors which led Sir John Sloane in 1809 to denounce "the Egyptian mania" as the latest manifestation of "that nonsier. Fashion"

Perhaps fortunately, Egyptian

styles did not have that overtone of the sacred which so effectually pushed Gothic Retowards historical exactitude in the first half of the nincteenth century. But then, as the authors of the informative catalogue remark, it may be questioned whether there ever was really something sufficientwidespread and organized to deserve the name of Egyptian Revival at all. The occasional use of sphinxes and obelisks as detailing on basically classical furniture was one thing; the thoroughgoing exploitation of Egyptian architectural forms in the course of normal British building quite another, resulting in the intermittent appearance of curiousities and monstrosmes such as Temple Mills in Leeds (1842) and the recently demolished Masonic Temple of

Consistent revival or scattered eccentricity, though, it makes a fascinating and delight-ful study. A couple of location watercolours by the first English artist certainly to visit Egypt. Richard Dalton, who went th in 1749, have been uncarthed

Opera

Mozart goes East

Idomeneo

Glyndebourne

Glyndebourne is heavy with an domeneo which it has yet to bring quite to birth. Much of what appeared at the opening of the festival, seemed promising. out there is much too that is inchoate and hard to decipher, particularly in the semi-darkness of some distinctly ca-

To a small degree, the fault Mozari's first opera for some years, Idomeneo drew from him an excess in almost every measure. The great majority of the recitatives are fully orchestrated, and the scoring throughout verges on being too richly-figured for its purpose. For instance, the recitative

before the final chorus is Idomeneo's abdication address and the tone is appropriately grave, but Mozart cannot resist enjoying his clarinets and so introducing a note of chirpiness that sounds odd in the surroundings.

However, the problems with this production were not all laid there by Mozart: some of them have been added by Trevor Nunn, whose first work in the opera house this is. Mr Nunn has noticed that he is dealing with a formal work. Accordingly, he has given it a formal setting, and introduced a Japanese motif into the designs by John Napier, and the staging. Samurai line the rear wall at the start, there is a branch of peach blossom hung decorously

This contributes much prettiness, and I have no objection on the grounds off anachronism or dislocation. For all I know, the Minoans sat around all day drinking ceremonial teas among their bonsai. What do cause difficulties, however, are the references that "Japoneserie" evokes on the lyric stage. Margaret Marshall's Illia because she does the Japanese thing so beautifully, is doged by the shadow of Madam Butterfly, and poor Carol Concert.

Hilary Finch

as Nicholas Timmins reports Ferrets who found the flu bug

Fifty years ago this year, in one of those moments of fluke that lie behind many of the best scientific discoveries, someone at the Wellcome Laboratories in central London thought that their ferrets had caught flu.

The ferrets were being used for research into canine distemper. But it was known that a 36-year-old pathologist, Christopher Andrewes, working with a colleague. Wilson Smith, at what later became the National Institute for Medical Research in Mill Hill, was trying to find an experimental animal that would catch flu to try to establish the cause of a disease that has plagued man for generations.

Fifty years on. Sir Christoper Andrewes, who will be 87 next month, recalls the moment with a smile. "It was the middle of a flu epidemic." he says, sitting at his home in Coombe Bissett near Salisbury, a mile or two from the Common Cold Research Unit he later helped to found. That is why we were working on it. We had tried infecting mice, guinea pigs and rabbits, by nearly every route. We had got

As news that the Wellcome ferrets had caught flu came through. Sir Christopher says. "I began to feel ill. My temperature shot up. I was getting the flu. Wilson Smith made me gargle to get some washings and I went home

from acing on the up Wellcome scientists. Wilson-Smith tried the washings in some ferrets. "The day I came back to work." Sir Christopher says, "about 10 days later, he was able to report that the first ferret was looking ill, with a stuffy nose and sneezing.

"The joke is that the clue about the Wellcome ferrets was all wrong. It soon turned out that their illness had nothing to do with influenza, they just had s slightly abnormal form of distemper. The clue was an accident, but we were able to go ahead from ther and pass the flu from one ferret to another. It was a bit of luck, but you wouldn't get anywhere without that."

The "bit of luck" rapidly led to the discovery that human influenza is caused by a virus. Samples from one ferret infected another. Purified samples were passed through cellophane filters with pores of a known size to show it must be a virus that was responsible, an agent so small that 150,000 stretched end to end would be needed to cover one inch.

And just to prove that it was flu the scientists were examining, one ferret sneezed in the face of another researcher, now Sir Charles Stuart-Harris, Emeritus Professor of Medicine at Sheffield University, and he went down with the disease.

It was the start of what is almost a world-wide industry in the study of the disease and the virus which today involves scientists from Britain to Australia, China to the USA and USSR, who between them produce For flu is still a killer - not the snuffles and temperatures that are known to virologists as "drift" and cheerfully described as "a touch of the "shift". Shifts are the major changes

It is not without justification that flu has been called "the last great plague", but the disease has probably been around since time immemorial. Both Hippocrates and Livy describe epidemics that sound like influenza. Similar outbreaks are reported throughout the middle ages, including one in Italy in 1504 that is said to have provided the English name, from the Italian for "influence of the stars".

None of these outbreaks can be said with certainty to have been influenza. but the outbreak in 1918-1919, the first "modern" flu pandemic, left no one in any doubt what the disease can do. Around the world, at least 25 million people and possibly more died. In Alaska, entire Eskimo villages were wiped out. In Samoa, a quarter of the population is said to have died. In Europe the epidemic has been credited, somewhat dubiously, with halting the last German offensive of the war. In Britain millions caught the disease and there were 150,000 deaths. Half a million died in the United States more than the number of Americans

The disease disappeared almost as quickly as it had arisen. The search for the causitive agent began in earnest, prompted partly by the fact that it appeared to affect pigs, leading to the pandemic being dubbed "swine flu".

Today much more is known about: flu and the unique blend of characteristics which make it perhaps the most successful virus of all. Flu is unlike most other viruses in that it infects both man and animals and, it is constantly changing.

flu, but the epidemics that still which occur rarely but which lead to irregularly sweep round the world causing thousands of deaths, millions of 1918, the Asian flu of 1957 and the of pounds in lost production, and much misery.

Shift safe the major changes which occur rarely but which lead to the great pandemics – the Spanish flu of 1918, the Asian flu of 1957 and the office of the safe of the saf ing new varieties of flu that can engender sizeable epidemics but not the great pandemics.

mine from the First World War. Spikes of haemagglutinin and neuraminidase, the two surface proteins, project like the mine's detonating spikes. It is these proteins that enable the virus to penetrate cells. But it is also the surface proteins that the human antibodies infection, destroying the virus and preventing the disease from develop-

The "drift" to which virologists refer results from small changes in the composition of the surface proteins which occur once the virus is safe inside a cell reproducing itself. As new infection, they may not recognize the infect someone else and start a new

"Shift" is quite different process. A suffer from flu. These animal viruses, of which more than 20 are known,

wave of flu.

number of animals, notably birds, have surface proteins markedly differ-

current theory is that either a man or an animal, most probably a bird, becomes infected with both a human and an animal virus at the same time. As the viruses reproduce, the eight pieces of RNA from each virus can become scrambled, one piece or more being swapped between the two. The result is a new virus, able to reproduce in man with surface proteins from the animal virus. Man's defensive system will simply not recognize the new virus strain, and the potential for a pandemic is born.

Laboratory studies suggest that this process can happen easily, yet pandemics are rare. This may be because copies of the virus are produced from many of the changes that take place are the RNA, tiny mistakes occur about lethal to the virus - they offer no once in every million. If the mistake advantage over the exising versions. produces a slightly different version of When a successful change does occur, either of the two surface proteins, the it still has to get out, to find a human 'new" virus may have an advantage to infect. Whatever the reason, such over the perfect copies. As the profound changes have produced antibodies gather to overwhelm the pandemics only three times this

new version, which survives to escape. In 1932, the year before the virus was discovered and the explosion in flu research began, Encyclopaedia Brittannica was advising bluntly: "There is no routine treatment for influenza except bed." Today, adding an aspirin or two, that is still essentially true, Vaccines can help to prevent flu, although they

strains which limits their effectiveness, and antibioitics can treat complications. But for flu itself, as for almost all other viral infections, treatment remains elusive.

Neither of the major shifts in to virus in 1957 and 1968 produced pandemics to compare with that of 1918-1919, although their effects were bad enough. What made the 1918-1919 outbreak so special is still a mystery. There has been speculation that after four years of war people were run down, that nutrition was poor, or that crowding in troopships and in trenches helped the explosive spread of the

"All these factors may have contributed," says Dr John Skehel, co-director of the World Health Organization's World Influenza Centre in London, and Sir Christopher Andrewes successor at the National Institute for Medical Research. "But it is equally possible that just about all of the impact was down to the properties of the virus. We do not really know what those were. As we do not know what made the virus so special, we have to say it is possible that it could happen

Although it is 50 years since the discovery of the virus, Dr Skehel points out that it is only in the past 20 years thay detailed biochemical work on the virus structure has been possible. "That is really not long in time we may get a much clearer idea about precisely what changes in the virus increase its impact on man, and from that we may develop drug treatments and better vaccines."

. Flu research has pointed to better techniques for studying many types of virus and led directly to the discovery of interferon - at the Mill Hill laboratories - which may yet have a role to play in cancer treatment. But the fact that flu keeps changing and has an animal reservoir makes it unlikely

that the disease will ever be eradicated. "If we ever do get rid of it," Sir Christopher Andrewes says, "it will probably be of its own accord. There was a period last century, between about 1850 and 1880, when there was practically no flu about. It could always happen again. We might say, How clever we are, look what our vaccine has done'. But it will pop up again when you are not expecting it.

DOWN

Unhappy end for a film star?

Hollywood - As old stars go she is showing her age badly, in fact, one might fairly say she's a bit of an old wreck.

She starred in countless movies: The Sting with Robert Redford and Paul Newman, Inside Daisy Clover with Natalic Wood and Steve McQueen and, more recently, Six Weeks with Dudley Moore

recently. Six Weeks with Dudley Moore and Mary Tyler Moore.

She has been in such TV series as Charlie's Angels. The Rockford Files, Three's Company. The Fall Guy and The Dukes of Hazard. She's has never had star billing, but without her all the above would have been missing tons of atmosphere and a genuine period feet.

She's instantly recognizable, although you will not find her in the Who's Who of Movies. She is a California landmark: she is the Santa Monica Pier.

Today, however, the vintage movie star is very frayed around the edges as a result of recent storms that devastated the California constine. They ripped up her pilings, shattered and scattered her timbers the length and breadth of the white beaches that fringe the state. She is heavily truncated - once 1.700 feet long, she is now 400 feet shorter because of the savage ocean, and those 20-foot waves washed

away her film career.

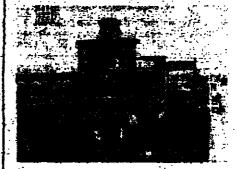

Today her fate is being pondered. For the next few months at least no movie crews will tread her creaky boards or shoot her in soft lights, no stellar personalities will sit astride her carousel horses.

Like any ancient film star this one has had a chequered past – and known several incarnations. The pier is actually two piers. The amusement portion called Newcomb pier was built in 1916, with the addition five years later of a fishing pier.

In the 1920s and '30s the pier way popular with courting couples, who waltzed and quickstepped to the beat of famous bandleaders in the elaborate La Monica Ballroom, which had been built in 1924 for \$150,000. On big band nights some 3,000 couples danced the night away and then took a breather by savouring the crisp ocean spray. When dencing wanted the ballroom became a skating rink and was even used as a makeshift city hall while the nearby Santa Monica civic headquarters was being built.

It was after the Second World War that

mark and turned it into a star Mark "Speed" Peterson, a former lifeguard who

with the pier, says there were times when the studios were lining up to rent the pier lo star in their movies.

"In 1960 they made Elmer Gantry (with Burt Lancaster and Jean Simmons) and used the ballroom as a preacher's tent." recalls Peterson. "And they filmed the fire sequences there. It was a pretty crazy time but the finished movie looked great. You'd never have known it was shot on the Pacific ocean and not in some revival tent in the Midwest".

For The Sling, the director George Roy Hill commandeered the famous carousel. which became the front for Eileen Brennan's house of ill repute. For Inside Daisy Clover, the studio built a small house in the middle of the pier then tore it down when the film was finished.

Whenever a scene called for a trip to a funfair, a day at the sea, a precarious helicopter landing, a dramatic drug drop, an offbeat chase, a simple fishing scene or just a loving stroll on the sand, the pier was called into service.

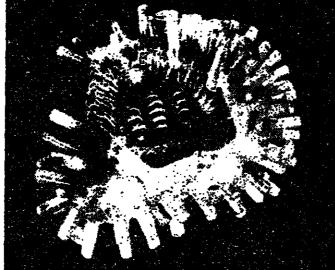

These days the pier rents for about \$400 a day - not a significant sum by standards of suffation-riddled Hollywood. But it badly needs a facelift costing \$1, m. which will have to be found by its owner, the city

of Santa Monica.

In 1972 the pier was condemned as an eyesore and the city decided to tear it down, planning in its place a 35-acre island with a high-rise hotel and convention centre, reached by a four-lane causeway. but the idea touched off a revolution in the city. The pier was reprieved and the architects of her destruction, three council-

lors and the city manager, were fired.
"It's a great old place." says Peterson.
"I'd like to see her saved." But who, this time, will come to her rescue in the last

PROFILE: David Bowie

Ziggy's rock and role reversal

Sexual indiscretions are not supposed to make public careers. but the David Bowie the world now knows was launched 11 years ago with a confession Admitting his bisexuality to an interviewer (this one, in fact) who was thereafter never quite sure whether he had dug out a genuine scoop or had been carefully manipulated, Bowie became an object of such fascination that an inasupicious career was spectacularly transformed. Quite how much is apparent this week, when he arrives for the British leg of a world tour encompassing 95 concerts, trailing his credentials as a pop icon, theatre, television and film actor, and, most vitally, the arbiter of a generation's style.

He began plainly enough as David Jones, his real name, following fashions, not setting them. His return to the public stage after a five-year absence filming, recording, rebuilding his once precarious health and reorganizing his business affairs has impressively reasserted his popularity. He is said to be recieving \$1m for a single appearance today at a rock festival in San Bernardino, California. His promoters claim that 500,000 people have applied for tickets to his British performances, which include three openair shows (July 1-3) at the 50,000-capacity Milton Keynes Bowl. A new recording contract with EMI is worth at last \$12m, \$1.7m of which he received for his first album under the deal. To EMI's relief, that record went to the top of the charts immediately after its release a few weeks

ago.

To fulfill his new obligations, Bowie has shown an unexpected willingness to be interviewed and, even more unusually, to confront his highly speculative personal history. To borrow a phrase of his former hero, Bob Dylan, this year he is bringing it all back home.

Recently he revisited his Brixton birthplace to be photographed by David Bailey; his three concerts at Wembley Arena later this week, followed by two at the National Exhibition Centre next week, represent another sort of homecoming in a remarkable, image-mongering career well as admiration.

and made famous, such as the transient, hybrid nature. androgynous Ziggy Stardust and the troubadour of "Space Oddity". Bowie says that at 36 such impostures are firmly behind him. He has turned his back on the trend of electronic pop which he started and which is now in

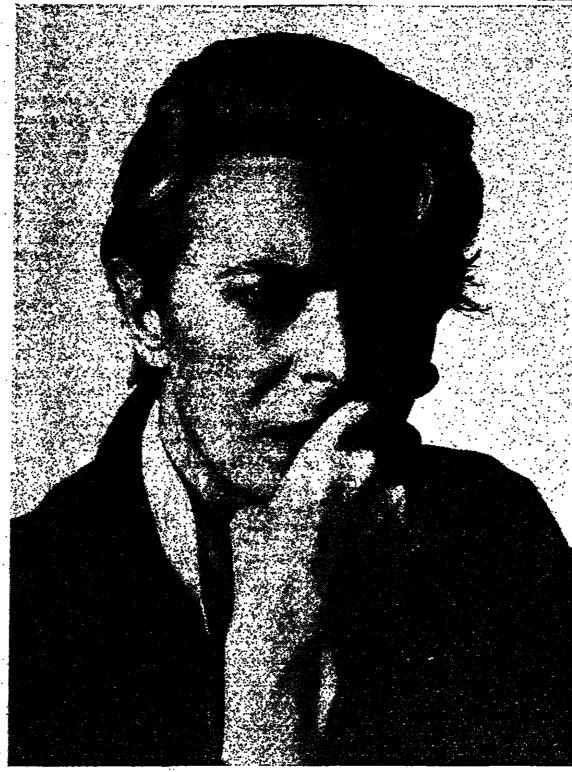

sicians. Let's Dance. his latest album, has caused consternation among the avant-garde by reemploying guitars and drawing sustenance from the simple, exuberant rhythm-and-blues he copied in adolescence. He calls it "emotionally uplifting" music, a prescription for the times, and the fruit of a newfound personal stability.

Inevitably, sceptics have al-ready declared that he is merely shuffling his pack of aliases - and such doubts may be forgivable, since warmth and wholesomeness have hardly featured in a career marked by brilliant calculation. His admission of bisexuality, apparently truthful and spontaneous, was a novel but risky tactic which set a precedent for the "coming out" of Elton John and other rock stars.

For almost a decade he had been struggling to establish himself: his well-timed pronouncement focused publicity on an unconventional personality and gave impetus to the launch of the album on which his career pivoted: The Rise and Fall of Ziggy Stardust and the Spiders from Mars, a feverish, uneven projection of rock stardom in a world awaiting apocalypse. What the world actually awaited was a pop phenomenon for the 1970s, to replace the Beatles and Rolling Stones. Looking abnormally glamorous in skin-tight cat-suit and spaceage platform boots, his hair a bright-red stook, Bowie initiated the new rock cult based on glitter and glamour, once neatly defined by John Lennon as "rock 'n' roll with lipstick on" and quickly debased by Bowie's many imitators.

Ziggy Stardust delivered Bowie his own stardom, then trapped him in its doomed persona from which he escaped into seclusion by the first of several strategic "retirements". It taught him that he could manufacture compelling images, and the musical styles to complement them, at will; the discovery has been the source both of his unwavering appeal, and of the common, sometimes warranted criticism that he is an opportunist whose emotions are not always fully engaged. Such which has provoked suspicion as imputations, often made by earnest adherents of earlier pop Although he will continue to values, undervalue his unexput on the costumes of the ampled sense of rock theatre and various identities he has created his understanding of the music's

to Berlin to recuperate. His insecurity can be traced Dudes"), Lou Reed ("Walk on

ished into mental institutions. He was not close to his mother. His father, who bought him a saxophone and supported his musical ambitions, died at the moment of his first hit, with 'Space Oddity" in 1969; he had at various times run a theatre troupe and owned a Soho wrestling club.

Bowie's own gift for publicity surfaced as a schoolboy in Bromley, south London, when he appeared on the BBC Tonight programme protesting the cause of long hair. Next he wrote to the washing-machine magnate John Bloom, asking for money to outfit his rhythm-andblues group. Bloom supplied a showbusiness contact through whom Bowie recorded his first single in 1964: "Liza Jane". credited to Davie Jones and the King Bees.

The 1960s were his undistinguished apprenticeship in pop music. He moved uncertainly between imitating Anthony Newley. (recording in 1967 a children's novelty song. "The Laughing Gnome") and dabbling as a hippie in mime, Buddhism and the arts-lab scene. The mime artist Lindsay Kemp opened up to him a new world, awakening theatrical instincts which were channelled, unsuccessfully, into show-business by a managercum-mentor, Ken Pitt. who earned Bowie's admiration by virtue of his friendship with the late film star James Dean, A peculiar consequence was that he sang the first English languageversion of "Comme d'habitude". which Paul Anka re-wrote as "My Way". More productive was a Bob Dylan phase, from which came "Space Oddity", his best-known song, which he has re-recorded and released several

In 1970 it was his good fortune, at least originally, to acquire as his manager an aggressive English lawyer. Tony DeFries, a consultant to models, photographers and music business executives. They were complementary. DeFries, the deal-maker, gave Bowie the confidence to exploit his ideas. But he also admired the style of Klein, whose high-handed methods briefly attracted such clients as the Rolling Stones and the Beatles.

Records, predicting with mas- anything else over the last five around him he began building to music and whatever else I do. produced the records of Mott the with the future." Hoople ("All the Young

to his family background. An the Wild Side") and others, older, beloved stepbrother vanwas using these more established performers to publicize himself.

Associating with Lou Reed, the Velvet Underground's influential chronicler of dark, New York street-life, certainly sharpened his own image of Clockwork Orange androgyny. But his musical collaborations, approached in a spirit of real inquiry, have generally been mutually beneficial; "Fame", for example a hit with John Lennon in 1975.

It has been a small step from

the impersonations of his records to acting itself, and each new role has reflected some aspect of his various personae. In The Man Who Fell To Earth. his 1976 debut as a film star, Nicolas Roeg (who had seen his Omnibus TV documentary, "Cracked Actor") cast him unerringly as a displaced alien. Just A Gigolo, a David Hemmings flop set amidst Weimar degeneracy. traded his fragile maieness against the camp legend of Marlene Dietrich. And in Baal, a BBC production in 1982, he was Brecht's coldly amoral anti-hero. Playing The Elephant Man, a lauded Broadway appearance in 1980, inverted his handsome image, a trick he accomplished by mime; and in The Hunger he became a senescent vampire. Not the least merit of Merry Christmas, Mr Lawrence, Nagisa Oshima's PoW drama, is that he finally learned to act rather than perform. Now he hopes to direct, and is starting with promotional video films at EMI's expense.

He has generally got what he wanted. In January 1975 he wrested control of his career from DeFries, though the settlement was punitive. As his own, conspicuously successful business manager, he keeps few emplovees and relies upon a formidably protective assistant, "Coco" Schwab, the only survivor of the DeFries regime. His private travels, which satisfy an interest in ethnic musics, include no superstar entourage.

He lives unostentatiously in a New York apartment and a house near Lausanne with his 12-year-son, Duncan, known in the American manager Allen more publicity-conscious days as "Zowie". This custodianship has allegedly conferred new responsibilities and happiness. 'I'm a single parent with a son". Defries signed Bowie to RCA he said recently, "and more than

THE TIMES **DIARY**

I'll ask Bob

When familiarity with our politicians turns to contempt, there is a simple cure: turn them inside out and upside down. Michael Curl has and upside down. Michael Curl has done this most adroitly in his dictionary of anagrams, published in paperback this week. The PM, as Saatchi knows can be metamorphosed into "That great charmer," but by way of balance. Curl offers "Meg. the arch-tartar." Poor Ted Heath becomes "Had teeth" or "The death" while, further back, William Ewart, Gladstone, turns, into "Wild. Ewart Gladstone turns into "Wild agitator means well." and Disraeli into "I lead, sir." Unamused as ever. Mary Whitehouse finds herself Mary Whitehouse finds herself saying: "I may rue the show." I cannot match all this, but that does not stop me trying. I have deedpolled the Labour leader into "Oh facile Tom," and David Steel into "Vital deeds" or "Laddie's vet", whichever he finds the more voteworthy. Roy Jenkins, as ever, stumps me, but his telegenic colleague David Owen emerges promisingly into a "Video dawn." Any more bright ideas? To get you Any more bright ideas? To get you thinking, first decipher the headline.

Why?

Election night will bring the resurrection of the flop of the century - the show that closed before it opened, losing £15m of backers' money. In March, when it was cancelled by Michael White on the grounds that it just would not work, the show for which the Piccadilly theatre had been transformed into a cabaret restaurant was called i. Now it is Y, and it has cost a further £500.000. It still stars the Italian mime Arturo Brachetti, but White's name is no longer on it. Launching on election night is not an attempt to cash in on the desire to escape the results: changes at the Piccadilly this time include the provision of a huge television

More than 1,000 cases a year are reported in the United States. according to the journal of the American Medical Association. The conclusion from a series of reports to that publication on battery-swallowers' syndrome is that if the battery sticks in the oesophagus. damage or death may result from leakage of chemicals, but if it reaches the stomach it will keep going without creating a hazard.

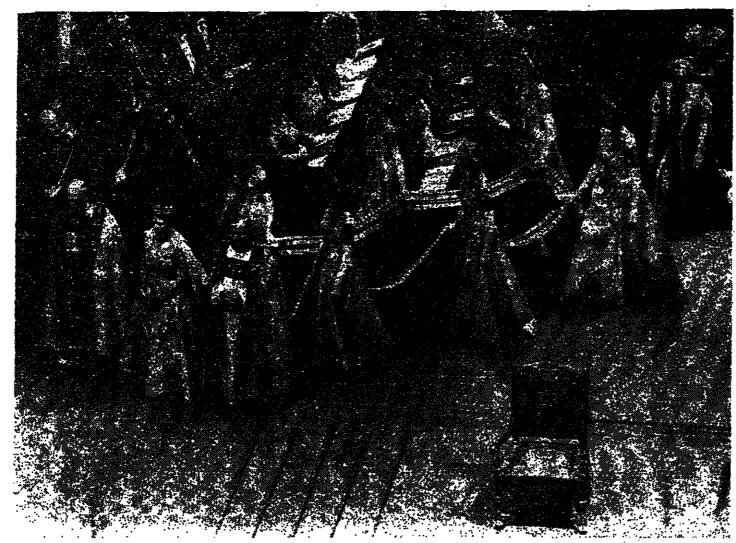

Charge!

Despite an admission fee of £25 a head, a one-day seminar next month at Apsley House on Wellington as a general has sold out. This may have something to do with the presence of the military historians John Keegan author of The Face of Battle, and Corelli Barnett, redressing the balance after his rather successful book on Napoleon. The seminar is the first in a series of events at Number Onc. London - this one takes place in the newly restored Waterloo Galleries, where else? designed to focus on the Duke's place in military history. The Friends of the V and A, to whom any profits will go, also want to see Apsley House become a living memorial, rather than merely a museum of the decorative arts.

David Petri is bats about cricket, to the extent that he has lashed out £17.000 to publish this weekend his own novel, Horton's Test, which Christopher Martin-Jenkin says is the first piece of good cricket liction since before the war. Purchasers get not only the paperback book but a leatherette spine which slips sportily over the covers "to enhance its

bookshelf appearance"; a batshaped bookmark; and a chance to enter a competition for seven days in the cricketing island of Barbados. The way to the book in the shops is signed by a size two cricket bat on display.

The Queen was crowned 30 years ago this week. Brian Barker, who was closely involved, recalls the preparations for the big day

June 2, 1953: months of painstaking effort come to a climax as the Queen walks in procession to her coronation

Vivat! Vivat! The day that grime gave way to glory

Some impressions never fail. My recollections of the events in which I was involved 30 years ago still seem

I recall standing in Westminster Abbey on the evening before the coronation. The months of preparation were over, and the grey Sanctuary had been transformed into a place of golden light. The raised platform of the "Theatre" was covered in a golden coloured carpet, surrounded by frontals of woven cloth of gold and with the magnificent Abbey plate gleaming on the high altar and displayed on a table below the royal box. Facing the altar was the ancient coronation chair with the stone of destiny below the seat and beyond was the raised dais of the throne with its deep scarlet

Once again, as for nearly 900 years, the Abbey had been prepared of kings and queens who had been consecrated and crowned within its walls. That evening the Abbey seemed to be wrapped in a hush of expectation

As a Gold Staff Commander I would have to spend many hours in that sancturary the next day. I turned and walked through the choir screen to where the Earl Marshal. the Duke of Norfolk, would receive the Abbey keys from the Dean, Dr Alan Don. For the next 24 hours, the Abbey would in the custody of the Earl Marshal. A few moments later a small black van with a single police car entered Dean's Yard.

It carried the most precious and fabulous gems in the world - the Crown Jewels with the crowns, swords and sceptres which tomor-row would move in scintillating splendour through the complicated rituals of the ceremony. The Dean. the chapter and choristers had formed a procession through the cloisters to escort the royal regalia to the old Jerusalem chamber where they were laid out on a long table under the watchful eyes of the yeoman warders from the Tower of London. For centuries the regalia had been brought back to the Abbey

on the eve of the coronation.

There had been mistakes and confusions in the ordering of past coronations. That of George III had been a disaster. Queen Victoria had not been amused by the manner in which her service had been conducted. She wrote in her diary that "the Archbishop was confused and puzzled, the Bishop of Durham could tell me nothing" and the Coronation ring had been forced on the wrong finger, causing her intense pain. Less serious blunders had occurred even at the coronation of

George VI.

We had been summoned to a meeting with the Earl Marshal in the Abbey in December before the work began. He had taken every detail of the preparations into his grasp. For example, he was concerned that all new timber should have been carefully seasoned. "The Queen ascending the throne to the sound of groaning timber might be regarded as bad an omen for her reign as the jewel which fell from the crown of George III at his coronation, and which was later regarded as presaging the loss of the American ionics," he remarked.

He set aside the whole of May for rehearsals. It was as well he did. It was difficult for elderly peers to follow a complicated pattern of movements, wearing unfamiliar coronets and with long robes sweeping their heels and in a few cases holding a heavy sword upright hencath their chins. Difficulties increased when the assistant bishops joined the rehearsals. Each bishop had his own idea of a liturgical pace. After several fumbling starts the Earl Marshal's voice came loud and clear: "If the bishops do not learn to walk in step we'll be here all night."

They got the message.

One who went off for a short holiday before a rehearsal felt the duke's firm hand. The Earl Marshal sent a police car to bring him back.

He came into the Abbey, pink with indignation, his chaplain carrying his hand luggage. "Most humiliat-ing". he protested. "Escorted from my hotel by police. What on earth will people think?" His protest faltered when he saw the gaitered figure of the Archbishop.

There were problems with a few peers whose attendance at rehearsals was also obligatory. "If you are not at the rehearsals, you will not be there at ail", the Earl Marshal told one peer protesting that he knew it all. There was not the slightest doubt he meant what he said. The rehearsals were very complex. precariously balanced, entirely dependent on the practised timing of the several hundred people taking part. That everything went with great precision was due to the superb organization of the Earl Marshal and officers of the College of Arms.

There was however, a slight fault On her arrival at the Abbey, the Queen would retire briefly to a room in the Annexe while the head of her procession moved down the nave. Her maid inspecting the arrangements, found we had omitted to supply the one item she would require on that important occasion - a muttor. We hurriedly supplied

My ministry had been drawn into the preparation since the Minister of Works was also Master of the Oneen's Works in lineal descent from Gundulf. the weeping monk of Rochester, who had begun the Tower of London for William the Conqueror. That responsibility for the upkeep of royal palaces and the preparation for state occasions had continued down the centuries. Until the coronation, the chief preoccupation of the ministry had been supporting Harold Macmillan's drive for 300,000 houses and the atomic energy programme. Overnight we suddenly seemed to have been dragged back centuries.

A small book was placed in my

hands written by an Abbot of Westminster in about 1307. It was the Liber Regalis-the Royal Book. and the first sentences translated from Latin were: "This is the order according to which the King has to be crowned and anointed. First, there shall be prepared a stage raised between the High Altar and the

That we succeeded in balancing the requirements of tradition with modern building technology was Eccles - now Lord Eccles. He was a intrusion. "It is absolutely intoler-fine administrator, he had taste, able", said the Marquis of A, "that style and imagination. He felt that here was a great opportunity to lift people out of the bleakness of a postwar era where meat, eggs and sweets were still rationed, and where the bomb scars in London were still showing. He told us: "The traditions and ceremony are our inheritance from the past, but it is our duty to express in colour and design the age we live in and the Queen who will be

He wanted to renovate London in the brightest colours. He had the wartime grime cleaned from the public buildings on the processional route. The ministry's decorations of the royal route were the gayest London had ever seen - no one will ever forget the great slender arches spanning the Mall with their suspended crowns and the lions and unicorns in their fantasy dances

broadasters. Pressmen. filmmakers turned to London as a bright light in a world darkened by the Korean conflict and the cold war. Eccles said to me: "For every thousand who will watch events in London in June, there will be a million who will watch through the eves of the press, the film and the TV screen. We must be sure that what they see brings credit and dignity to the Queen and our COuntry.

One of our problems was meeting the requirements of the BBC for a live recording of the ceremony Television in Britain was still the growing infant of the media with a mere 1.5m licences compared to the 11m radio listeners and the worldwide audience for newsreels and

Why bother, it was asked, with the BBC needing space for its cameras and high demands for special lighting. The first time we set up lights in the Abbey to BBC requirements the result was an intolerable blaze of light. "Impossible", exclaimed the Archbishop of Canterbury.

Opposition to the BBC making a live broadcast gathered force. Many were genuinely concerned that the live broadcast would impose an extra burden on the Queen during the long ceremony. There were also important participants in the ceremony who feared that their slightest slip would be instantly transmitted to the watching millions and there were some who were mainly due to our minister, David horrified by the very thought of the

They also served ... men from the ministry put the finishing touches to the "Queen's Beasts" adorning the Abbey annexe

chaps in pubs should watch the Queen with their third pint of beer in their hands"

The opposition found its final expression in the decision of the Coronation Joint Executive Committee when the Earl Marshal announced that "live television would be restricted to the procession west of the choir screen but that a film of the ceremony would be made available to the BBC". I told him that the decision would create an uproar in press and Partiament. Indeed it was so. An angry Winston Churchill rose in the House of Commons to state that the arrangements would be reviewed. A chastened BBC returned to the Abbey a few weeks later with more modest lighting needs and from there went on to its own crowning triumph of Coronation Day.

into London to use the elaborate facilities which had been provided to get their accounts back to their countries, including the two Canberra bombers which carried recordings of the ceremony across the Atlantic for the US and Canadian networks. David Eccles did much to promote the atmosphere of gaiety, colour and rejoicing which turned London into a carnival city which the world came to see. I shall always remember the crowds dancing in Trafalgar Square to the rhythms of Jamaican drums and the voices of thousands singing
"Wonderful, Wonderful London

Town" as the rain cascaded down. Before daybreak the next day. was in my place in the Abbey. I had to deal with hitches and alarms. For example, an enclosed position had been constructed behind the tombs on the north side for film and TV cameras to record important parts of the ceremony including the crowning. During the night a thick coat of dust had filtered down onto the glass apertures, and the camera operators were in despair. I told them to save their tears and give me their handkerchiefs. Below the camera positions were scated three rows of bishops. When I explained the situation their astonishment changed to amusement. I passed along the handkerchiefs and one by one the bishops rose to clean the glass panes above their heads. Without their help the world might never have seen the colour film and TV records of the day from that position.

A white light came on at my elbow to tell me that the Queen in her coach had left the palace. A surging roar in the distance was drowned by the drums and trumpets as the first procession reached the Sanctuary. The rest of the pictures of that day are in my mind like a film to be recalled at will. For me, the most arresting incident was not the hushed solemnity of the crown upraised in the Archbishop's hands, but the moment when the voices of the choir were still and the Queen came through the choir screen to the triumph and shouts of the West-minster schoolboys. "Vivat Regina. Vivat Regina Elizabetha Vivat! Vivat! Vivat!" Before us was the slender and lovely young Queen regal, in a magnificent gown covered in thousands of pearls.

The events that followed have been captured on colour film and TV - some to be shown this week. The solemnity, the colour, the dazzling spectacle of that occasion are on those records, but I feel they lack the vibrant excitement, the sense of participation and the rejoicing that filled the Abbey.

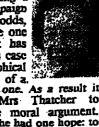

At the end of that long day I read what another civil servant, Pepys. had written in his diary of the coronation of Charles II.

"I can say that beside the sight of these glorious things. I may not for the future trouble myself to see things of state and show as being sure never to see the like again in this world". After 30 years that is also my own

opinion.

Morality, hijacked by the Tories

Labour is fighting a civilized campaign against great odds, but it has made one big mistake. It has failed to put its case in a philosophical context, instead of a.

purely material one. As a result it has enabled Mrs Thatcher to monopolize the moral argument. From the start she had one hope: 10. deflect the attack on the unpopular results of her policies by transferring the guilt for her own failures on to her listeners. She does it by presenting herself as the guardian of stern "values", which alone can purify a gone-soft society. And, of course, on questions of defence she bangs the simple patriotic drum.

It is a technique designed to leave the Labour Party arguing about details instead of principles. It should, of course, have been the other way round. For the issues in this campaign are indeed moral

Mass unemployment, for instance, can never be a purely economic matter. It undermines the foundations of our society. No country can save itself from decline, spiritually even more than economically, if it tolerates the sense of hopelessness among its people which comes from uselessness.

Which comes from uselessness.

Yet that mood, which is growing dangerously, is grist to Mrs Thatcher's electoral mill. She was even claiming with satisfaction on TV the other day that the majority of young people in this country, including those who are out of work, are satisfied with the lot she offers them and will vote for her. If that is true, she has lowered the sights of a whole she has lowered the sights of a whole generation.

The accusation would not stand, of course, if she could hold out any hope that the "purifying" process was coming to an end. But that she cannot, and will not, do. What Labour should be hammering home is that unemployment is politically necessary to her type of society - one in which the workforce is cowed into submission, in keeping with the "Victorian values" she invokes,

In the same way, we are in danger of letting her ride away from the essentials of the nuclear argument. To say that the Labour Party does not wish to defend this country is, of course, a malicious fallacy. Labour's whole case is that defence loses its meaning when the use of nuclear weapons is involved. We are in a new ball game because never before in human history have we been preparing to make war with weapons which would bring global and irreversible catastrophe, to ourselves

Michael Heseltine's parrot talk about "deterrence" will no longer do, because the line between having nuclear weapons to deter and having them to attack is wearing perilously thin. If, as he declares, their sion by the West has kept the peace for 34 years, then we already have enough of them to deter. What both sides are now pursuing is nuclear superiority.

And as the consequence of the new weapons that are being developed grow more terrible, so that the arrival of even one enemy missile would wipe out half of Britain, the search for nuclear superiority is increasingly seen to lie in finding a weapon that will knock out the enemy before he can retaliate. So we are right into the heart of the moral dilemma which Mrs Thatcher refuses to recognize would we be willing to use nuclear weapons first?

such a situation, the acquisition of new nuclear weapons has become the alternative, not the road, to multilateral disarmament. You cannot openly accuse another power of planning to make war on you, and then expect it to lower its guard. The need for a non-nuclear strategey has become imperative in our own defence, as independent groups of military men have urged. But who is going to start to create the non-nuclear psychology if Britain does not give the lead?

That is the essence of the case for nuclear unilateralism. A majority of people probably now agree that the installation of cruise missiles and the acquisition of Trident would put us in greater peril than we are in now. It is the pursuit of overkill that will lead to war, for two can play that game. Britain's abandonment of cessary nuclear weapons would be a signal that the great powers could pull themselves back from the brink, a signal for which, unless we believe in devils, the Soviet Union itself is probably waiting. In such a situation, the argument about Polaris is largely irrelevant.

Labour's contribution to multilateral disarmament is not to trade weapon for weapon, but to create a new atmosphere and to proceed from there step by step towards the creation of a non-nuclear weapons world. It is time someone tried.

Robin Marris

Charting a path to recovery

Although the Conservative Party Labour much to say about unem-ployment, neither is proud to emphasize the fact that Britain has been declining economically, relatively to other countries, for many years. Their reticence is hardly surprising, since both, in different ways, are partly responsible. In sharp contrast, the Alliance faces the facts of the nation's decline much more frankly, and quite explicitly claims to have policies genuinely aimed at reversing it. But its claims are frequently countered by the reply that the policies are reheated versions of old pro-growth policies

which have failed in the past.

The evaluation of this controversy requires a distinction between 'macro" and "micro" economic policy. Macro policy is concerned with demand, inflation and unemployment. Micro policy with detailed policy toward industry. Far from having bland or vague policies on the latter, the SDP and the Liberals have precise prescriptions in profusion, and these are their strongest economic policies.

They emphasize the existing deficiencies in industrial and vocational training and education and propose specific reforms of the apprenticeship system. For the greater encouragement of industrial competition, they suggest further discouragement of mergers, more practical assistance to small business and the reduction of bureaucratic obstacles to those businesses. The link between economic growth and

education is emphasized. Mr Patrick Jenkin, the Industry, Secretary, recently defined the aims of his Department as "a profitable, competitive and adaptive productive sector in the United Kingdom. Worthy motives indeed, but nowhere did he mention the need for better industrial education and planning. Why was it recently necessary for the Director of the National Economic Development Office to remind the Government that this country spends only half the European average on vocational training.

Having said all this, I have to concede that my own economic research has also sustained me in serious misgivings about Alliance "macro" policy, mainly because it seemed to me to run away from the problem of the unions. The specific policies on union reform are blatantly schizophrenic. On the one hand they pronounce the fundamental role of unions in harmonious industrial relations; on the other they make detailed proposals which, if put into law, would make Mr Tebbit look like a workers' hero (for example the closed shop, accepted in principle, would in practice be effectively banned by a scheme requiring validation by regular secret ballots of workers involved. requiring two third majorities from all those entitled to vote).

On wage inflation they have a has much to say about inflation and battery of proposals which are quite unworkable without union cooperation, which they blithely believe could be obtained effectively in exchange for a promise to rellate. The truth is that the SDP in particular contains many activists who are deeply anti-union, but that it is also strongly influenced by wets" who think quite otherwise.

I believe that so long as they fail to tackle this, any alternative government that tries "another way" of recovery will fail for the same reasons that all the others failed.
"Free" collective bargaining and Keynesian economics are simply unreconcilable, and no amount of tinkering can make them otherwise.

But I do believe that if Britain had been governed continuously for the past half century by the kinds of people and policies now represented in the Alliance, we should now be not only a much richer nation but a much happier one. I also believe that brisk economic growth possible for us in the future; and that major precondition is that the Altiance does quickly succeed in becoming the strong alternative government.

The reasons for such unfashionable optimism lie in the very historical circumstances of our decline. From the Second World War till the early 1970s the western capitalist mixed economies (meaning all countries from say. Italy upwards in per capita income) experienced spectacular economic growth at about 4 per cent per annum per head of population. Inside the average the countries which started from the bottom end of the league table, tended to grow faster than the others. There was a general impression that the whole system was catching up the United

Britain was not originally at the bottom of the league table; in 1955 we were second in Europe and fifth in the world. But we were a long way behind the United States. What should have happened is that as other countries caught up with us. we should have caught up with the US. As everyone knows, almost the opposite occurred; the other countries not only caught us up but overtook us. A quarter of a century on, we are now bottom but one in Western Europe, and also bottom but one out of the top 20 countries in the world.

The causes of Britain's decline are hotly debated, go a long way back, and are not exclusively economic. It is generally agreed that it is a joint product of many ingredients involving class, education, management and labour. But be that as it may, it remains a fact that if we could fall behind, we have potential for catching up.

HOUSE PROUD POLITICS

in housing. When the state first intervened to build homes for heroes. Lloyd-George's Unionist coalition partners supported public provision on the ground that it would settle social discontents. A generation later, Lord Swinton minuted Churchill's Cabinet about the practical consequences of the policy. He warned of hives of socialist voters bunched together on council estates. Four years ago Mrs Thatcher acted on the warning, sensing political opportunity in the break-up of the estates and the transmutation of council tenants into owners.

Threading through Labour areas there was to be a new seam of owner occupier, people with a territorial stake, social stability, a respect for inheritance rights (and as a bonus, a disposition to vote Conservative). Has she not been proved right? Her government had banged mercilessly on the drum of "right to buy" and gloried in those mock-Georgian doors replacing municipal drab. The latest arithmetic of discounts for tenant purchasers may make questionable financial sense for the taxpayer, but the right to buy theme makes undoubted political sense for the

Conservatives. Unfortunately owner occupation does not make a housing policy, nor do bargain basement prices for public assets suggests a willingness to begin the much needed overhaul of housing finance. Victorian values are one thing: the growing dilapidation of the country's extensive tracts of Victorian housing is another.

We are, by any international purchasers, fixed on that distant goal of ownership in fee simple. often showing a yeoman distaste for landlordism public or private, and prudently aware of the fiscal favouritism shown to that form of tenure. Yet this fact reflected even in Labour's manifesto promise to extend home their own repairs at the council's ownership - makes pressing some considered statement on the future shape of the rented sector, where 45 per cent of householders are still accommodated. All the manifestos fail to provide one. Renters are the security. poor, dependent on state support For the rest, the manifestos and lacking the wherewithal or are unreliable on two counts.

consciously non-sectarian, cross- kind.

Conservative politicians have motivation to buy, the elderly One is the numbers game which often had a clear eye for politics (who may have been owners but all governments are tempted to need the specialist housing and support which councils can provide), the infirm; they are people, and people on the move for jobs.

No party appears to have linked housing policy and the conditions for renewed economic growth. Yet these must include housing for migratory workers as well as mobilization of some part of that great portfolio of assets now locked up in the building societies, for example by the provision of upmarket rented accommodation. Everywhere - most worryingly in the Conservative manifesto there is damp pessimism about the future of private renting: this reflects a refusal to face the inequalities of housing finance.

For years now a housing white paper has been needed to address the rented sector as a whole. It would redefine the role of council housing, yes, as a 'residual' however much the town hall managers and Labour councillors might dislike that word. But it would also give councils a renewed role in clearing the unhappy end of the urban private rented market with its poor tenants and unmotivated landlords in order to re-launch the private rental market free of its Lloyd-George restrictions on rents and tenure. There is a role, too, for the publicly-financed but semiautonomous housing associations and their often imaginative schemes for renting; the vitality of the associations is bought at the risk of lack of test, a nation of convinced house accountability and concealed bureaucracy.

The writers of such a white paper would take little from the housing paragraphs of the manifestos currently on display. All parties now appear modishly to subscribe to the idea of "rights" for tenants, for example to do expense; and all - especially the Alliance - are starry-eyed about the management problems arising from a stock of council dwellings more than half of whose tenants now rely on social

play over the scale of housebuilding: the other is the fact that any sensible housing policy must also the rich and transient, the inflict some pain. - through middle-income single, young councils charging reasonable rents, through the erosion of that distortion contained in mortgage tax relief, and in the liberation of building land in those desirable parts of the country where the jobs happen to be. Labour is mesmerized still by

house-building aggregates, as if foundations laid, preferably at public expense, were the test of virtue they once were. The party's plans rely on a concept of housing need as an absolute when instead it is an unreliable and shifting agglomeration of preferences within a crude surplus of physical buildings over households. That said, Mrs Thatcher's government has seemed complacent. Unless the boom in private sector building recently described by some does indeed happen, by the middle of the decade there will again be a marked discrepancy between households and houses, with

keen consequences for prices and

social comfort. The government's refusal to give any estimates of the future course of housing demand has sadly been typical of an approach that has failed to locate housing investment within the national economy or acknow ledge the artificial buoying up of demand for housing funds through fiscal distortion and housing market imperfections (stamp duty, estate agency) protected by governments.

Because manifestos are about promises to give things to people, the Conservatives do not claim credit as they should for pushing council rents up to a more realistic level (though the recent spectacle of some councils subsidizing their rates through council rents suggests the process may be going too far). Sensible housing policy for the 1980s requires taking things from people - like the benefits of mortgage tax relief, some security of tenure, green fields needed for building. The Conservatives with their acute sense of housing's politics are making no such threats, and the other parties promise all things to all men; housing policy suffers as a result.

Protestants that a transform-

LETTERS TO THE EDITOR

From Professor Royden Harrison Sir, The Prime Minister rightly contends that this elction offers us the most dramatic and the most important choice since 1945. But neither Mrs Thatcher herself, nor the other protagonists, can claim to have explained the nature of that choice in its philosophic terms nor to have placed it in its historical

Alas! One looks in vain to Mr Roy Jenkins to improve the debate. Having announced that he come to break the "mould" of British politics. he has put himself in a thoroughly he has put himself in a introughly false position. Instead of proudly taking up the mantle of the Conservative leader which is truly his, he cannot break himself of the

The Opposition is in transition from Labourism to Socialism. Mrs. and the structure of power.

At the same time the Tories themselves are experiencing divisions which are hardly less profound. The Conservative tradition indentified with the "wets" is going down before the radical reaction of the "arids". The process was inaugurated by Mr Heath, not by Mrs Thatcher. After all it was Mr Heath who diminished the British Commonwealth of Nations in favour of belonging to a European market. It was Mr Heath who wanted to sweep away, at a stroke, the whole existing structure of industrial relations in favour of some untried, radical, systematic,

But it was indeed not until the advent of Mrs Thatcher that Conservatives so far forgot themselves that they mounted a frontal attack upon the whole post-war social settlement. The mixed economy should be dismantled in favour of "small business". Comprehensive social services should be replaced by a two-tier system favourable to the thrifty and to the deserving poor. Keynes was wrong and Beveridge was mad when they suggested that Government could and should accept a responsibility for full employment. Then in an inspired after-thought Mrs Thatcher per-formed the Indian rope trick. She made a glorious defence of the outposts of Empire after the Empire had gone. The Falklands. the Rock. Hongkong. It is to be expected that, within the lifetime of

West Strathclyde (Conservative) Sir, Your leader today (May 20) Backing for Beirut", asserts: "On the pressure side, what is missing at present is a strong reaffirmation of European views on Lebanese sovereignty, coupled with strong reminder

of Syria's obligation to respect it".

No. Sir. Yesterday, in the
European Parliament in Strasbourg. just such a strong statement and reminder were given in a resolution which had overwhelming inter-party and international support.

Characteristically enough, a Lebanese delegation was present duringthe week, led by Mr Kamel El-Assad, President of the Lebanese Parliament. Mr Shimon Peres, Leader of the Israeli Opposition, was also there with his delegation. Last month a high Syrian delegation visited us, maintaining against our protestations that any bilateral Israel-Lebanon settlement would "compromise" Lebanese sover-

eignty. The proposition stands that "European" opinion is of much more significance outside than inside the Community.

With great respect - what is missing is consistent coverage by The Times of the place where that opnion is first given wings. All three countries, Lebanon, Syria and Israel. have already got the message. I remain, Sir, Your obedient

ADAM FERGUSSON. 9 Addison Crescent, W14,

Test of faith From Mr Harold Ingham

Sir, It has no doubt occurred to many of the readers of Mr Solzhenitsyn's recent article and subsequent correspondence in your columns that some of the most appailing examples of cruelty and brutality are constantly seen to take place in areas where those responsible are most strident in proclaiming their respect for the deity in Northern Ireland, the Near East and Iran.

Yours faithfully, HAROLD INGHAM, 4 Christ Church Avenue, Tunbridge Wells, Kent.

Energy savings in housing stock

Sir. I write in reaction to the article Over-insulated homes in The Times on May 23, as I believe that such generalised condemnations that modern domestic heating and insulation methods are believed insulation methods are believed (after 10 years of research development, demonstration and successful application) to be a serious threat to energy efficiency in our existing housing stock by insulation and venulation control is worthwhile both on the control is worthwhile both on an individual and national basis. It can be, and has been supported by strong cost-effective and comfort arguments.

up" in rooms of domestic dwellings occurs only when the rate of air change in those rooms is well under one half an air change per how. We have in the UK millions of post-war houses when the change is the control of the change of th houses where the air change rate is in excess of two to three air changes per hour. The purpose of the "save it" campaign and indeed much other was to encourage house owners and occupiers to reduce their ventilation rate from the upper to the lower limit. Thereby not only saving energy, but reducing draughts and

untimely demise!

The methodology and techniques for safe, sensible ventilation reduction are generally available, and surely it is not unreasonable to expect at this time that he who raises the alarm, might also be required to describe the way in which such problems can be avoided. Horizontal membranes (ie damp proof courses) in modern housing with concrete floors may in new housing be part of the answer, but in the vast majority of existing housing, the established technology of window located trickle ventilators, already proving effective against condensation, are by sustaining air movement and air change a more realistic

University of Wales, Institute of Science and Technology, 24 St Andrews Crescent, Cardiff. May 26.

People's route

From Mr R. E. Ross

Sir, The People's March for Jobs 1983 is converging on London. On Tuesday, May 31 it was due to pass throught Harpenden on its route from Luton to Hemel Hempstead. For reasons of traffic safety, it has been diverted down the A5, which passes through miles of empty countryside, and thus it is diverted away from the consciousness of a

prosperous commuter town. The unwillingness to face some traffic disruption seems a sad reflection of the dull indifference of the South-east (where unemployment rates are nevertheless uncomfortably high) to the desperation of the marchers from the rest of Britain.

Yours faithfully, R. E. ROSS, 21 Connaught Road, Harpenden, Hertiordshire.

The Denver Boot

From Lady Sugden Sir. The ignitor of the University halls of residence in Edinburgh used to make the rounds of vehicles which were not parked according to his rules and paint a very big whitewashed X on the driver's side of every windscreen. This added considerably to the inerriment of the Edinburgh Festival, though rather more in retrospect than at the time: the ianitor certainly enjoyed it.

would commend the practice to the Metropolitan Police as a greater economy than the dreaded Denver **Boot**

Yours faithfully, MARIAN SUGDEN, Trinity Hall. Cambridge.

Hooked on the fly

from Mr A. L. Maycock

Sir. Before a new myth is created by John Hewish (May 21), may I say that fly fishing on beautiful Lady-bower Reservoir and secluded small lakes here in the North-West for tasty, hard-fighting rainbow and brown trout stocked especially for our enjoyment is indeed the sport for the many. Hurray! Yours, etc.,

A. L. MAYCOCK, 59 Old Hall Road, Cheshire.

Wayward water

From Professor John Lourie

Boroko,

Papua New Guinea.

Sir, It is a myth that water swirls down the plug-hole in different directions in the northern and southern hemispheres. In my house in Port Moresby (11° south) I have a double-sink unit in the kitchen: the water goes down one plug-hole clockwise and down the other anticlockwise. I am Sir. Theatres to get sponsor for awards

The annual awards of the Society of West End Theatre, in seven years have established themselves as probably the most important theatre awards in Britain, are to be sponsored by the English Tourist Board for the next three

Mr Michael Montague, chairman of the board, said the decision is in recognition of the London theatre's key role in attracting annually 30 million domestic and 7.5 million overseas visitors to the capital. It is estimated that more than three million overseas tourists go to the theatre, representing half of the total attendance at

London theaures. Mr Montague added that the constant forecast that the lights would go out in the London theatre was "rubbish". He said: The future for the London theatre is as strong as the talents of the artists, playwrights, composers, designers and dir-

They are the theatre, not the buildings. Our decision to become the sponsor of the SWET annual awards for the next three years is our recognition of where stimulus is

needed." This year the eighth annual awards ceremony will for the first time take place in a theatre. the Theatre Royal, Drury Lanc.

trunking, like stubby tentacles or tendrils, which penetrate right up into the glazed vault itself.

the form of a glazed mall, dominated from on high by gir ntic white

The colour coding is clever: most things in the mall below roof level are blue; the council chamber exudes a pinkish glow, the restaurant (on a split level, thus offering the possibility of a medieval dais) is a confection of greens; and the main offices are restrained in pinstripe greys and creams.

The character of the building is high-tech: that is to say, it is a building which derives its character from its metal structure, from its catwalks and services and there is no attempt to create a different "town hall" character

It is an architectural approach largely confined to factories, with the possible exception of the Sainsbury Centre Art Gallery, in Norwich, by Norman Foster, to which certain parts of this building notably the spiral staircasc down into the finance department.

OBITUARY

MR E. M. **GLOVER** Journalism in prewar Malaya

Mr Edwin Maurice Glover. who died in London on May 18 at the age of 85, was a newspaperman who had spent many years in Malaya where he became managing editor of the influential Malaya Tribune group of pubications, a post he was occupying when the Japa-nese invaded in December 1941, and from which he was well equipped to write In 70 Days his account of the Japanese conquest of Malaya, which was published after the Wac.

Glover had started his journalistic career in Yorkshire. but in 1927 he left Britain to join the Penang Gazette as a sub-editor. From there he moved in 1930 to the Straits Times in Singapore and three years later was offered the general managership of the evening paper, the Malaya Tribune

Seeing an opportunity to create a Malayan national newspaper Glover oversaw a expansion which by 1938 became the Malaya Tribune Press Ltd controlling the largest group of newspapers in British Malaya with printing plants in Singapore, Kuala Lumpur, Ipoh

most other postmodern town halls,

many of which are many times the size

The main redeeming feature of the exterior is a pair of semicircular gable

ends to the glazed mall, which protrude

above the roof and act as beacons to the

central spine of the building. It is not

quite the same as emphasizing the front

door or main entrance, but it performs

the same function. The gables are celebrated by a sunburst motif and, in

one of them, a clock face. There is something about the sheer joy of that detail that is reminiscent of Durham.

For all that, however, the rest of the

building's exterior is peculiarly blank,

communication nothing. It could

indeed be, as is said of a certain tower in Pekin, the "Ministry of Certain Things". But at night, when its form

becomes a rich glow in the darkness,

only the interior matters. Those

attending the dinner were indeed

When the Japanese invaded Glover left Singapore with his wife and settled in India where he wrote In 70 Days which was published in 1947. This was an unsensationally critical account of the British response to the Japanese menace in which he blamed the authorities for failing to mobilise the local knowledge capacities and enthusiasms of the civilian population in the face of the threat.

In 1945 he returned to Singapore to restart the papers which had been closed down by the Japanese and in 1948 he returned to London where he subsequently served in the Foreign Office.

He leaves his widow.

MARY KENT HARRISON

Mary Kent Harrison who died on May 25 at the age of 67 was a painter noted for her still life studies - particularly of wild flowers - and landscapes, and she had also designed for dance groups in Britain and overseas. She trained at The Kingston School of Art. The Slade School and The Royal Academy. From early in her career she had onc-man shows at London galleries such as the Brook Street, Wildenstein and Leicester gal-

She was closely associated with the dance world for many years and she designed for the London ballet schools and dance groups in this country and abroad. She was also the author of the costume construction book, How to Dress Dancers.

From the 1960s onwards she lived and painted in the Pendle area of the Lancashire Pennines, interspersed with regular visits to a second home in northern Spain. Over the years she came to identify with the Lancashire countryside and its people. This was reflected in her work; especially, perhaps, with the wild flowers she adored. Her work in still life and the landscapes drawn from the Pennine hills were widely exhibited throughout the North. Her work was acquired by galleries overseas, as well as hy

the Ministry of Works, Lancaster University, county councils and many private collectors at home and abroad; and it was used to illustrate The English People - a study of Britain in pictures.

She was a regular exhibitor at the Royal Academy, and also cahibited frequently at the Royal Scottish Academy and the Royal West of England

COL KENNETH TREASURE

Colonel Kenneth Treasure. CB, CBE, TD, DL, who died on May 26 at the age of 69 had for many years been HM Coroner for the county of Monmouth-shire, latterly Gwent, and was a well known figure in the county and throughout South Wales. Kenneth David Treasure was born on September 20 1913 and educated at Cranbrook and the University of Wales. He was admitted solicitor in 1937 and, having served since 1932 with the Monmouthshire Regiment (TA) he subsequently went to

India and Burma with them after the outbreak of war. After the end of the war he was appointed a Deputy Coroner for the county of Monmouth and was also from 1946 to 1949 a Legal Adviser to the Control Commission Germany. He was appointed Coroner for Monmouthshire in 1957.

A Deputy Lieutenant for the county, he was also active in its Territorial Army as chairman of the Wales and Monmouthshire associations, and as a member of the TA Advisory Committee. Ministry of Defence.

He was appointed CBE in 1965 and CB in 1972. He married, in 1941, Jean Mitchell and they had one son

and one daughter.

first of the game's three great annual Gretchen Rush v Andrea Jaeger festivals, are half over. Which and Hana Mandlikova v Mrs Lloyd means that most of the fun and Miss Durie has beaten two deeds, charm and vitality have drained out Pamela Shriver and Kathy Rinaldi, of a singles programme now despite the fact that clay is by no solemnly concentrated within the means her best surface. Miss Ruth. two main arenas. Even so, the half term report contains facts of note to anyone with a sense of history.

For the first time since 1970 there over Mrs Lloyd occurred in this contains the sense of history.

TENNIS

Miss Navratilova

beaten on merit

From Rex Bellemy, Tennis Correspondent, Paris The French championships, the Tracy Austin v Miss Duric

Miss Navratilova did not fall

Miss Navratilova's backhand and went to the net to put away what were often careworn returns.

The status of favourite thus reverts to Mrs Lloyd, four times

champion. This raises two ques-tions. At the age of 28 could she win at least one Grand Slam singles title

for the tenth consecutive year? Her record in this respect is already

unique. And as United States and

are two Frenchmen in the last eight, although one of them, Christophe, marred a good performance against Roger-Vasselin, was born in Andrea Temesvari yesterday when, London. For the first time since angered by a line decision, she marred a good performance against.
Andrea Temesvari yesterday when,
angered by a line decision, she
shouted at the umpire in a manner
that suggested imminent hysteria.
By a process of association that
brings us to John McEnroe, who has
now been fined a total of roughly
£2,150 for his conduct when playing
Ben Testerman in the first round. Susan Barker won the title from a weaker field in 1976, a British player Joanna Durie, is among the last eight women. For the first time since 1950, the women's quarterfinals include five players born in the United States. One of the last group is Kathleen Horvath, aged 17, who has a Hungarian father, a German mother but was born in Ben Testerman in the first rou Such fines do not mean much. It seems that the "system" will tolerate McEnroe whatever he does

or says, as long as he gives the
"system" his financial support.
Thanks to his enviable skills
McEnroe has reached the last 16 for
the second time in four attempts. On Saturday she became the first player to beat Martina Navratilova (last year's winner here) since Chris Lloyd did so in the final of the Australian championships on Dec-ember 5. "Everybody thought Martina was invincible," Mrs Lloyd said yesterday. "But she's human— which means that sooner or later she had to lose a match." The men's draw has, in fact been reduced to 12: Connors v Roger-Vasselin, Lendl v Noah, Higueras or Gomez v Arias or Vilas, and Wilander or Sundstrom (both Swedes) v Teltscher or McEnroe

Weekend results

Miss Navarablova did not fall apart emotionally, as she sometimes used to do. She was beaten on merit by a smarter, tidier player who had nothing to lose except a tennis match. An interesting feature was the bold way Miss Horvath attacked Miss Navarablems, backband and Wen's singles

GOLF

Ballesteros looks made to measure

By John Hennessy, Golf Correspondent

Severiano Ballesteros, the United States Master golfer, stands on the threshold of his first victory in Europe this season at Royal St Coorge's. He leads the PGA wood from 245 yards out nestled collections and the season of the leads the PGA wood from 245 yards out nestled collections. Championship, sponsored by Sun Alliance, by only one stroke, but the glow of victory seems to be upon him and Nick Faldo, the outstanding player of the year after three successive victories, has removed

imself from the reckoning.
With a third round of 67, three under a formidable par, and a total of 207. Ballesteros leads Brian Waites (who scored a 66 yesterday) by one stroke and Sandy Lyle (67).
Ian Woosnam (68) and Bill Longmuir (68) by two. Faldo, one stroke behind overnight, took 74 and languishes eight strokes behind Ballesteros's lead is tiny, of

course, but he is playing with such authority, and with such audacity when danger threatens, that he seems to have the measure of both the course and his challengers. With due respect to Waites, a canny golfer of now advancing years. Lyle seems to be the only man with sufficient weight of shot to trouble the Spaniard.

The heart of Ballesteros's round was the passage of three holes from the fifth, where he reeled off birdic, birdie, eagle. At the fifth (422 yards), his four iron evoked a 20ft putt

Another birdie, at the long 14th, proceeded along equally failiar Ballesteros lines, a pitch shot from deep rough to two feet. At the next. similarly, he saved his par with another 20 foot putt after driving into the rough. His special appeal is that he is no golfing machine. You never know what is coming next Lyle finshed, disappointingly, with a five, failing with a four-loot

putt struck with casual indifference. or so it would appear. But this is his general golfing style and who would dare to say that it does not serve 74, D Siftyin VI, 70, 75, 218: In Cutars 73, 75, 77

Amateur championship ratio in a field high quality. Seven which begins today at Turnberry in Ayrshire has a new look. For almost a century it turned its back on stroke-play, but this year two qualifying rounds, one each over the championship course. Allsa, and its companion. Arran, will reduce the field to 64 for the match-play stages. The main reason for the change is to eliminate the risk, in an increasingly cosmopolitan field, of players coming from a distance and being without even completing a

An entry of 288 means only two out of every nine qualify, a harsh

Walker Cup teams have entered and more than one third of the field is

from overseas title; two former winners are Peler McEvoy, showing renewed competi-tive interest, and Michael Bonalack, who won here two years ago and is making his 28th and final appearance in the championship. Best of the remaining Americans may be Willie Woods, voted top US collegiate golfer last year, and Juy Sigel, aged 39, but freed from the cares of last week's captainty.

EQUESTRIANISM

France keep hold of the reins

By Jenny MacArthur

France, the reigning world team, collected 12 faults in each champions, won the Prince of Wales round. Cup in the Nations' Cup event, sponsored by Everest Double Glazing, at Hickstead yesterday. It was the second time in two years the France's win was particularly rewarding for their chef d'equipe. Marcel Rozier, who had brought a Cup had gone to France and their Hickstead, Frederic Cottier, one of cup had gone to France and their victory puts them at the top of the League for the President's Cup, which is judged on each country's six best Nations' Cup results. their top riders, was not in the team because his horse Flambeau has injured a leg. He is expected to be fit

for the European championship at Hickstead in July.

Yesterday's French team included Andre Cheng, who rep-Britain finished equal third with Germany and Australia, behind the Netherlands. It was a disappointing day for the British. Liz Edgar had 20 resented his country in a Nations' Cup event for the first time at Rome faults on Everest Forever in the first round and then had to retire him carlier in the month and Philippe Rozier, who is 20 and was on his first wisit to Hickstead: Patrick Caron was the only member of the team who was also in the winning team for the world championship

last vear Their fourth member, Pierre

refusal at fence nine, an upright which caused more trouble than any other fence on the course. Durand made sure the same thing did not

Ironically, the only horse in the competition to have two clear rounds was Ideal de la Haye, ridden by Duccio Bartalucci.

Germany, fielding a strong team, also had a disappointing day. This was attributed to the heavy going which did not suit their horses. The world champion, Norbert Koof and Fire, had eight faults in each round and Paul Schockemohle, the European champion, had a clear round the second time, but collected n-and-a-half faults with Deister in the first round.

But Malcolm Pyrah and Towles Durand, who rode Jappeloup, is the rands Angiczarke, who went last and reigning French champion. In the were considered the mainstay of the fourth round, Jappeloup had a 3 switzerland, 13 pix, 4, Germany, 12 pix.

Strong run by Elliott lifts gloom

By Pat Butcher The enticement to compete in the seventh United Kingdom Closed Championships could hardly have been put more succinctly than in one of the sponsor's advertisements
"Come and talk to us about money runs the calling card of HFC Trust. Since the British Amateur Athletic Board were offering financial rewards for finalists, placings and best performances, over 800 athletes

were only too pleased to answer.

The perenial deterrent in Edinburgh is the weather, but rain on Saturday and drizzle most of yesterday did not; stop seven athletes from receiving a windfall of £500 for setting new championship bests. With the extras for wins and overall best performances Peter Elliot and Shirley Strong earned £750 in training grants, plus the traditional silverware for the sideboard. But the money was thinly spread because of the reluctance of top British athletes to begin their season so early. So wiiss Strong's pink leotard and Ellioty's from running did much to lift the

Miss Strong's 13.15sec for 100 metres hurdles just ousted Ventssa Head's 17.69 metres in the shot as Saturday's best performance but Elliott's 800 metres victory reflected the vitality of British mac's middle distance runners on a weekend when it was confirmed that one of its top practitioners. David Moorcroft is not even certain of getting fit in time for the first world championships in Helsinki Moorcroft, the world 5,000 metres record holder, has a stress fracture of the foot to add to the hepatitis which has restricted his training for three months this year He has to rest completely for the next couple of weeks and says that the likelihood of regaining form good enough to win gold in Fielsinks is remote. Ellion's personal best was a hand-timed 1min 45.56sec.

a nan-timed (min 4).30sec.

The most thrilled of the championship record breakers was Yvonne Murray, aged 18. She returns to school tomorrow to wait for her exam results and consider a university place in the United States or a career in banking. If she believes in omens the £500 she got for winning the 5.000 metres and beating the former world record holder Paula Fudge should steer her on the latter course.

Northern Ireland

Englan∂.. Bobby Robson walked away from his testing ground, Windsor Park, on Saturday night with glass paper in one hand and litmus paper in the other. After the goallesss draw against Northern Ireland in the Rritish Championship, a match as also have scored on his debut. Butcher's cross and Withe's Butcher's cross and Withe's

There were three of them that were of particular note. Roberts and, to a lesser extent, Barnes, the eighth and ninth players respectively to be introduced to Robson's extensive laboratory, were beginning anew, Hoddle, making his first full appearance since Ron Greenwood's departure last summer, was wood's departure

cris' opening could not have been shakier either in the air or on the ground. After half an hour he reached the height of his misery by stooping to head Armstrong's ankie-high cross. But for the remarkable reactions of Shilton, who pushed it round the post. Roberts would have equalled the recent feats of Lee and

Blissett by scoring on his debut. Since both England full backs were being beaten. Neal with alarming regularity by Stewart. Roberts can be considered unfortunate to be left exposed in the middle. He recovered during the closing half hour but by then it was too late and it will be surprising if yet to come.

sturdy back door, was not retained. Robson explained that he was misinterpreted on Saturday. When he said it was "now or never" for Tottenham Hotspur's gifted representative, he meant that judgement would be made over the next

examining as an awkward cup tie. England's manager sat down on the return flight to study the results of his experiments.

also have scored on his debut. Butcher's cross and Withe's cushioned header released him on the left but the angle was too oblique and Jennings, winning his 98th cap. the left but the angle was too oblique and Jennings, winning his 98th cap, 100 experienced.

Cowans tried too hard this usual strength, distribution, was his weakness). Withe was not fully fit and Francis was given too little to

do.

Billy Bingham was satisfied with his firsh defence, in which McClelland was outstanding, and with his industrious midfield, but dissatisfied that "we didn't get the goals." Stewart, by far the most lively of the seven forwards on view, almost did just after the interval but almost did just after the interval but Shilton preserved England's hopes of retaining the British title.

"Scotland played better against us than England." Bingham said, "but than England." Bingham said, "but they were on home territory and their side will be completely different at Wembley." Ireland still unbeaten at home for seven years, take on Wales tomorrow night, but that, in the public's eye is merely another relatively meaningless dress-rehearsal. The main feature is yet to come.

too late and it will be surprising if Osman is not brought in to replace him and to partner his Ipswich Town collegue. Butcher. against Scotland on Wednesday.

It would be equally unexpeted if Hoddle, who looked the most capable of unhinging Ireland's Referee. H King (Wales)

Heads to the fore: From left: Armstrong and Hamilton

Stein studies his options

Scotland..

The question is, did Scotland flatter on Saturday to deceive on Wednesday? We have seen before Scottish sides who threatened to conquer the world, only to trip up on their own doorstep and fall flat on their face. At least Jock Stein, who has had his share of disappointments as manager. poured cold water on the aftermatch hysteria by remarking that he had a lot of thinking to do, and that Wednesday's match with England

was still a long way away.
Indeed, it is far enough away for
him to be tempted into tinkering
with the machine and ruining the
smooth performance of Saturday's first win in Wales for 10 years.

Many would dearly love to see the inclusion of the super-charged Nicholas at Wembley. The perform-

would by unlucky not to do so. One pairing that is certain to remain intact is that of Souness and Strachan, Strachan, his busy, probing style almost comical, was the one who caught the eye, but it was Souness who left a more lasting image. How Robson, England and even Bingham must envy Stein in

Championship table

its conclusion, as engineered in great precision by Souness. It was a delight the way he neatly trapped Strachan's short corner and then ance of either marksmen, Brazil and Gray, did not demand that they stayed to face England, but they chipped invitingly into space for Gough to harass Southall, the goalkeeper, into error, Brazil tucked away the ball as it ran free for his first goal in 12 internationals.

Scotland had taken the lead after just 12 minutes, when McLeish was given space to drive in a header, which Gray helped on its way into WALES: N Southat: J Jones, N Statter, Nicholas, P Proc, K Ratcaffe, G Davies, Flynn (sub: S Lowndes), J Charles, M Thoma K Jackett.

RUGBY UNION: COUNTING THE COST OF VICTORY

McBride angry with the Lion tamers

From Don Cameron Palmerston North

British Lions.....25

There was skin and hair flying, too literally for anyone's liking, during and after the British Lions had struggled to defeat Manawatu on Saturday by two goals, a try, two pensity goals and a dropped goal to a goal, two pensity goals and two

his face stiff and grey, claimed that two of his forwards. Claran Fitzgerald and lain Paxton, received head wounds after being scraped by Manawatu sprigs sprigs, and that
Gaham Price, the prop, had been
marked about the body.
McBride commented that this

was nothing new in his experience of rugby in New Zealand and his lieutenant, Jim Telfer, said that from his experience with Scotland in New Zealand two years ago, anyone on the ground ran the danger of being kicked. McBride suggested that what appeared to be common practice in New Zealand and Terry Holmes is still recovering surged back for a converted try from head cuts suffered in the Wellington match - would result in and in some disarray. However,

the player being ordered off in Britain.

McBride welcomed the appointment of the Frenchman Francis
Palmade for the first (next Saturday)

and second internationals. "He will make a nice change." said McBride. Saturday's injuries, thankfully, were not severe and Paxton, with two stitches in a head cut, was the only Lions player who required further

The severity of the Lions opped goals. itinerary so far was tough but good
Afterwards. Willie John McBride, preparation for the first international, said Telfer, and he was

pleased the Lions would enter the match as under-dogs. Yet this was a haphazard performance by the Lions, who were thwarted by a sturdy and spirited Managatu pack who were not well organized enough to take command of the match, reaching half-time only 9-3 ahead after the Lions chose

to play into a stiff wind. A clever blindside try by Trevor Ringland and Ollie Campbell's conversion put the Lions level with 36 minutes to play, yet Manawatu fought back to 12-all. Campbell made it 15-12, and Manawatu which had the Lions 15-18 down

when Ringland chased after a hopeful kick inside the Manawatu 22-metre line, he was ablto to charge down the clearance, score easily and Campbell's conversion - and a late try by Paxton from an eight-man shove - put the Lions clear of

In the second half, even when the lions should have been sending along in the strong wind, they could not break clear from the strong Manawatu pack and only with Paxton's try near the end did they make a concerted attack on the Saturday's opening international

Manawatu-line.

The Lions had to rely on the astonishing Campbell with 13 points, five successful kicks from six attempts. and the bonus of Ringland's second fortunate try.

Ringland (2) and Paxton scored the Lions tries and Campbell added a drop scoil. Two conversions and the lions tries and Campbell added.

Ivano can repulse

Irish challenge

With one eye on Wednesday's Derby it will be fascinating to see how Erins Hope performs in the Brigadier Gerard Stakes at Sandown Freak today. For this was the four-year-old who ran Salmon Leap to a head in the Nijinsky Stakes at Leopardstown earlier this month. Before that Erins Hope had finished third behind Vincent O'Brien's those drawn his close to the far the service of the

Before that Erins Hope had finished third behind Vincent O'Brien's other Derby runner, Lomond, in the Gladness Stakes on the Curragh.

So, his form is certainly entwined with two of the most prominent runners in the premier classic. Also with the rest of the season in mind his presence in the line-up will provide a pointer to what we can expect when the leading members of the current classic crop come face to face with their elders.

Irish stables are making a concerted effort to win the Brigadier Gerard Stakes because Senior

age scale. In the meantime, On Stage paid

him a handsome compliment by winning so easily at Haydock Park

on Saturday. So no matter what O'Gorman says about the flying Brondesbury I still prefer Fearless Lad in this instance, especially now that he has two races under his belt.

Finally Gouverno is just pre-ferred to Jade Ring for the Whitsun Cup in the belief that he may have been attempting the impossible at

Thirsk recently trying to give 7lb to

The uncertain weather still looks atmosphere of controversy has the crest of a wave as D-Day ike deciding the destination of the surrounded the Nijinsky colt since approaches. Not content with 104th running of the Derby. In Paris his inexplicably bad performance landing a treble at Haydock on esterday Pat Eddery said: "It all behind Diesis in last autumn's Saturday. Carson flew to Milan Dewhurst Stakes. However Gorytus
had previously galloped his way into
favouritism for this year's classics
with an authoritative display in vesterday where he won the Gran Premio D'Italia on Celio Rufo. Not to be outdone Eddery also rode three winners at Phoenix Park on Solford, Gimme Pleasure and Doncaster's Champagne Stakes and let there be no doubt in anybody's Ankara

mind that his trainer is confident of a good showing if the gods of the weather relent.

Solford beat his stable companion Caerleon in the Craddock Advertising Race and Vincent O'Brien will weather relent.

Ladbrokes offer 10-1 against
Gorytus with the proviso of a run.
They make Teenoso their favourite
at 11-2 and offer 7-1 against
Lomond, 8-1 Salmon Leap and 12-1 now choose between the pair for next Sunday's Prix du Jockey Club

next Sunday's Prix du Jockey Club (French Derby) at Chantilly.

At Haydock, where heavy rain forced the stewards to abandon the meeting after only four races, the highlight was Schuss's runaway win in the Cecil Frail Handicap, Owned in partnership by Lord Porchester and Bob McCreery Schuss always galloping far too strongly for his rivals and eventually beat Airfield by four lengths. by four lengths.

Schuss is a headstrong individual who fights hard for his head. On Saturday he was litted with a special double bridle, the same kind that was used on Relkino before he defeated Artaius in the 1976 Benson and Hedges Gold Cup at York. Judged by the speed that he showed. Schuss will now be making his presence felt in pattern race. All lovers of an outstanding horse. The English Prince filly is likely

CYCLING

Elliott first home again

By John Wilcockson

A weekend of racing across the Midland and Cheshire plains in the Mill. Race gave the Great Britain amateurs victories to boost their morale before the first mountain stage today. The Commonwealth Games champion Malcolm Elliott. eight days, as many as any British rider has achieved in a tour of At Sesson Park, Liverpool,

vesterday Elliott sprinted home ahead of the pack, just as he had on Saturday at Burntwood, near Birmingham. In between, his colleague, Neil Martin, outsped Tony Doyle, the Great Britain proffessionals, and Palov (Czechos-lovakia) to win the circuit race at The attack by Doyle demon

strated the willingness of the British professionals to take on the 10 amateur teams, and they assumed the same role yesterday. After Sid Barras and Phil Bayton had made repeated attacks in the opening half ur of the 79-mile stage Stoke-on-Trent. Sean Yates broke away at Knutsford.

away at Knutstott.

The pace was so high that when Stauff (West Germany) punctured, he could not regain the bunch. A Pole went to the front, then a Czechoslovak. A pedal went through the Pole's rear wheel, and Barraws lost his place as a result But through the ruck Elliott plotted a safe route to hit the front 200 metres out.

metres out.

STAGE 7 (Stake-on-Trent to Liverpool, 79 miles): 1, M Blant (GB Area), 2, P Becker (WG), 3, P Sandaris (Den), 4, T Deserves (FI), 5, S Yatas (GB Pros), 21, 21 Ya Amin Szsan, Other Bitish placings: 17, A Doyle (Pros), 19, S Barras (Pros), 27, P Bateman (Amer), 31, N Martin (Amar), 34, P Baylon (Pros), 48, S Jones (Pros), 41, K Lambert (Pros), 48, S Jones (Amar), Other (Amer), 41, K Lambert (Pros), 48, R Downs (Amar), Other (Amer), 41, K Lambert (Pros), 48, R Downs (Amar), 510-35, 4, P Looks (Switz), 82, 10-35, 5, V Houze (C2), 76, 10-65, Other British placings: 7, M Electi, 26, 11-52, 11, Lambert, 26, 12-37, 13, Yates, 26, 12-36, 14, Martin, 26, 11-36, 24, Bayton, 26, 14-27, 29, Downs, 26, 13-36, 24, Bayton, 26, 14-27, 29, Downs, 26, 13-36, 24, 51, British (Maria), 26, 14-36, 62, Jones (27, 12-56, 51, Britishen, 27, 01-35, Kalté, 1, WG, 78tr (2min 14-9ec, 2, US, 78, 18-24, 2, C., 78, 18-28, Marian (M. YACHTING Bullen is the one to beat

By John Nichells

The two offshore races of the The two offshore races of the Tomatin series, now taking place on Loch Fyne, have been more like merathons for the 240 yachts taking part. The long race, which opened the series, took almost twice the time expected for many of the competitors, and the shorter race vesterday was another drawn out

affair.
The lock was almost devoid of wind all day and only at the start, and much later at the finish of the drastically shortened course, did the boats move with any purpose.

In between they drifted slowly along, strung out over miles of Kintyre as the classes went away at intervals of 10 minutes. Nine hours later, having sailed only 18 miles, the first boats in division A1 inched their way towards the finishing line. Several boats retired, but the ones that are already beginning to accumulate useful points stuck it out to the end. Among them was Barry Bullen's Flash, one of only two boats before yesterday to have achieved two first places. She leads the extremely competi-tive division B1, which contains 28

half tonners (including Flash) racing on level rating as well as for the division prize.

The other winner is Hilvador (George Fleming) in division D. The series continues with the second Olympic-type race today, with the third Olympic and final

MOTOR RALLYING: A total of 122 drivers from 16 countries set out from Athens today at the start fo the four-day Acropolis rally (1.415 miles). Michele Mouton (France), last year's winner and the only woman driver in the competition, is favoured to win again in an Audi

Head delays decision on Alexandrie in Oaks

From Desmond Stoneham. French Racing Correspondent, Paris

Whether to the hour Saturday until Oaks at Epsom next Saturday until Tuesday morning despite the fact that large continental bets reduced the filly's price from 12-1 to 5-1 Eddery did little better in the Prix de during the weekend. Head's Derby Pesperance where Brogan ran third runner. Pluralisme travels to the 9-1 chance Rutheford and England today and can only have a moderate each-way chance. Patrick-

will saddle All Along for the Coronation Cup..
The Prix Dollar at Longchamp The Prix Dollar at Longenump yesterday went by a short neck to the favourite. Weish Term from the German champion Orofino, who was receiving 2lb. A length and a half away third came Darly. Weish Term now goes for the Eclipse Stabes print to the Budweiser. Stakes prior to the Budweise Million at Chicago.

Lehmi Gold disappointed in his first run in Europe, finishing only eighth of the nine runners. He raced just behind the leaders until the straight but was then a spent force. Freddie Head said afterwards: "It's all new to him. He came down the hill badly, but I'll tell you Lemhi Gold will improve many kilos on this." The colt will next run in the 12-furlong Prix du Chateau on June

Pat Eddery had no sort of run on Silver Dip in the Prix du Palais Royal, so the filly stays in France to contest Wednesday's Prix du

MUNTUNGDON SELECTIONS: 2.0 Baz Bombasi. 2,30 Captan Ezra, 3.0 Bright Casts, 3.30 Draha's Pinnacia, 4.0 TV Star, 4.30 DEVON SELECTIONS: 2.30 Getting Pienty, 3.0 Fishings Crumble, 3.30 Beu Range, 4.0 Golden Titx, 4.30 Pettistree, 5.0 Cumbertand Basin, 5.30 Big Jake, WETHERBY SELECTIONS: 2.0 Tidy Work, 2.35 Gold Shoveler, 3.10 Richdee, 3.45 Hill's Guard, 4.20 Honourable Man, 4.55 Brigen, HEXINAM SELECTIONS: 215 Hallo Cheeky. 245 Cackham Led. 3.15 Pain Cross. 3.46 Good Crack. 4.15 Kristenson. 4.45 Holborn Head.

CARTINEL SELECTIONS: 2.0 Gun. 2.25, Rodace. 3.10 Twidale. Vilings. 4.20 Kumon Sunahina. 4.55 Great Head Boy.

Alec Head will not decide Sandringham. The race went fairly whether to run Alexandrie in the comfortably to Honeyland from Oaks at Epsom next Saturday until Negundo and Princely Penny. The

England today and can only have a moderate each-way chance. Patrick-Louis Biancone will not run Water Gun contest the Prix Millionaire 11 Girl in the Oaks as she did not stay the 10 furlongs of yesterday's Prix for Auction and The Foodbroker de Saint-James, but the Frenchman will be in action in the Prix La PRIX DOLLAR (GROUP is inc 6/) WELSH

 Stephen MacDonaid has cleverly missed the trap that could easily have turned his play, NOT ABOUT HEROES (Radio 4.7.45pm), into a manusca (reside 4.7 Appm), into a documentary. It is the true story of the short-lived friendship between Siegfried Saxsoon and Wilfred Owen with MacDonald himself in the part of Sassoon and James Telfer as Owen. The two meet in August 1917 when both are patients at the Craiglockhart War Hospital for Nervous Disorders, receiving treatment for shell-shock. Both are under a cloud. Owen has been branded as a coward by his colonel while Sassoon, eithough decorated for bravery at the Somme, has recently made a public statement as covering the coverment of washing recently made a public statement accusing the government of waging — a controversial anough apisode — a controversial anough apisode

that MacDonald fails to pursue. The

MONDAY MAY 30 1983

capitalize on Steel's popularity

between success and failure for the Alliance, Mr Jenkins said: Yes, I have always said I never liked it. I would be prepared to do anything to advance the cause of the Alliance, but there is no point in doing that. We are not changing rules; we are not changing titles."

Mr Steel said the Alliance accepted that they had not been as successful as they should have been in getting their policies across, and they would concentrate on that in the second half of the campaign. They did not believe, Mr Jenkins said, in "routine political invective

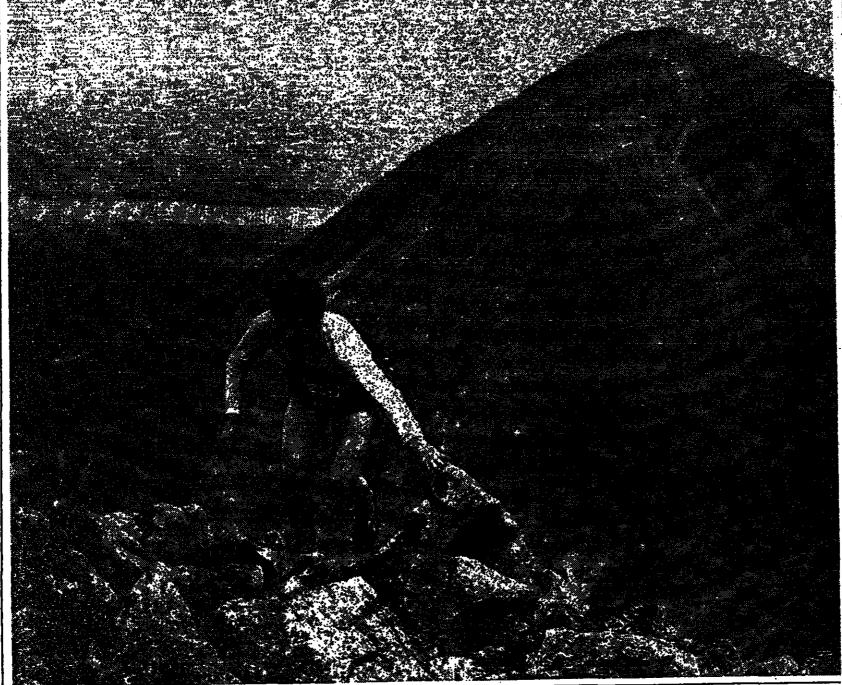

Asked if they regarded the role of the Alliance to be a party of opposition moderating Mrs Thatcher's policies, Mr Steel: "Not at all. We believe that, at the moment, the Tories are winning - at the moment - but it is our task not to just overhaul the Labour Party, but to see if we can catch Mrs Thatcher in time." Asked if that was realistic, he said: "We think it is attainable. I would not put money on it, but we think it can be done."

The Alliance was making substantial headway in areas where Labour was holding seats. The strategy meeting had come to the conclusion that at the halfway point of the campaign, the Labour Party had been defeated. The Alliance was therefore gearing itself to, first of all, a switch of voters from the Labour Party as people realized it could not win, but also for a switch of Conservatives who usually voted frem

fear of socialism
Mr Steel said the Alliance rejected the claim that there was no alternative to unemploy ment. "We say there simply has got to be. That is what the public believes, and we are going to provide it."

The Liberals attending were Lord Tordoff, joint chairman of the Liberal Election Committee. Mr Alan Beith, the party's Chief Whip and Mr John Pardoe and Mr Paul Tyler, both former members of Parliament and senior campaign organizers. From the SDP there were Dr David Owen, Mr William Rodgers and Mrs Shirley Williams, Lord Diamond and Lord Harris of Grenwich, and Mrs Anne Sofer, a member of The Greatr London Council.

Most of the politicians were casually dressed and most of the advisers in suits and ties. Mr Steel was wearing a white Arran sweater with faded blue jeans and white plimsolls.

Mountain runner shatters record

Saturday's Bens of Jura fell Gosforth Harriers, in a time of race was won by Andy Styan, aged 35, of Holmfirth Harriers, in a record time of three hours 24 minutes and 37 seconds for the 16-mile course.

In the photograph by Tom Kidd, Brian Tronghton of Bury AC is seen tackling Beinn Shiantaidh with Beinn an Oir (Mountain of Gold) rising magnificently to 2,571ft in the background.

Second placed runner to cover the seven mountain summits and 7,500ft of ascents over the Inner Hebridean north-easterly winds gus island of Jura was veteran 20 knots and an a Andrew Philipson, aged 42, of temperature of only 9°C.

Third home was Martin Hudson, aged 37, of Keswick AC in a time of 3.30.49. The previous best time for the gruelling race, described by

seasoned fell runners as "the toughest by far in Britain", was 3.39.22, set in 1974 by B. Finlayson of Lochaber AC. Restaged after a gap of eight years, with the aid of whisky sponsors. Mackinlay's, Saturday's race was run in strong

Unity at Williamsburg

Continued from page 1

The subject of huge US budget deficits and high interest rates came up at all the private bilateral meetings but was not expected to dominate the formal economic meetings at which unemployment and currency fluctuations will be highlighted. In the interests of harmony the leaders appeared to accept the new Reagan Administration line that high budget deficits are neither the

cause of high interest rates nor a threat to the promising recov-

concern about the possible impact on British airlines of an anti-trust suit in the United States, arising from the collapse of Laker Airways.

A British spokesman said Sir Geoffrey had "registered our point of view" during a private discusseion with Mr Donald Regan the US Treasury Secretary, during a private meeting at Williasburg.

His intervention follows talks between American and Bristish officials in London last week, at which it was agreed to extend the deadline for US Justice Department information-gathering subpoenas against British Airways and British Caledo-

Letter from Williamsburg

Lobster for the President yogurt for the press

At Versailles last year there was free champagne, pate and a huge variety of French cheeses for the accompanying borde of journalists.

This year the fare at the Williamsburg summit is more modest - beer, bamburgers, tastee" chips and almost every kind of fast-food im-

One of the main problems for any government organiz-ing a summit meeting of this nature (and it will be Britain's problem next year) is what to do with the press

All the conference sessions are taking place behind tig-htly-closed doors in a specially secured part of this picturesque eighteenth-century town, Even when the talking has stopped, access to the main participants is virtually impossible except at brief press conferences.

Catfish with hush puppies

So it has been decided that the best way of keeping the press happy is to lay on a constant supply of food and beverages. The summit organizers have consequently erected a huge blue and white striped tent covering more than an acre, where from dawn until midnight journalists can fill themselves with frozen yogurt, jelly-bean flavoured ice cream and Kentucky fried chicken.

The eight summit leaders are eating in much grander style. Craig Clairborne, the food writer of the New York Times, has devised a series of menus for them "made from American ingredients and American inspiration" that are intended to show American cuisine at its best.

Their fare ranges from pork barbecue to Maine lobster, from Tex-Mex fish tamales to a Louisiana crayfish speciality known as Cajun popcorn, from California goat cheese to

gingersnaps.
Craig Clairborne believes
that American cooking has been maligned for far too long and views the summit as a chance to set the record straight.

However, one wonders whether President Mitterrand will really take to "deep fried catfish with hush puppies".

When it comes to pagean try, the Americans can match the British any day. Whatever their ceremonial guards may lack in tradition they more than compensate for with the

precision of their drilling and

the verve of their music.

An honour guard made up of all four services greeted all of the summit leaders as they arrived by horse-drawn carriages outside the former governor's mansion in colo-

nial Williamsburg But the main attraction was provided by a Redcoat drum and fife band which paraded in front of the welcoming dais playing a medley of old-Ame-

rican tunes.

Tactfully, the band dropped
Yankee Doodle when Mrs Thatcher arrived in case the song's revolutionary conno-tations might offend her, and played The British Grenadier

Sadly, a similar attempt to be tactful backfired with two of the other leaders. Mr Pierre Trudeau, the Canadian Prime Minister, was greeted with a rendering of The Maple Leaf Forever, which stirs unhappy memories of defeat among French Canadians, while Mr Yasuhiro Nakasone, the Japa-nese Prime Minister. was serenaded with a song that was used to raise the morale of Japanese Navy crews before going in to battle during the Second World War and symbolized the rise of Japa-

Hats off for dashing Trudeau

Mrs Thatcher appeared to be far and away the most popular of the six visiting leaders with the natives of Williamsburg if applause is anything to go by. She received rousing cheers when she arrived, whereas the other leaders were offered only polite applause.

Perhaps if the Americans had not revolted two centuries ago, the citizens of Williamsburg would be Tory voters

But if Mrs Thatcher drew most applause, Mr Trudeau caused the biggest stir when he arrived, looking like Maurice Chevalier in a dashing white hat and a red rose in his button hole

To the dismay of the photographers he took his hat off almost immediately and kept it off throughout the arrival ceremony.

Eventually one frustrated photographer yelled at him "put your hat back on" and Mr Trudeau - an experienced self-publicist - kindly obliged.

Nicholas Ashford

The papers

The question now facing the SDP-Liberal Alliance was one of survival, according to The Observer, yesterday, which praised the Alliance's policies but accused it of a lack of passion and "curring edge" in its electioneering.

Assessing the Conservatives' claim for a second term. The Sunday Times praised Mrs Thatcher for the Falklands victory and the Zimbabwe settlement and said she had changed the national mood for

But the country was more divided, the Conservatives con-

Dealing with the Alliance's dual leadership. The Mail on Sanday said Mr Jenkins had proved as much of a disaster for the SDP as Mr Foot had for Labour. Without the trappings of office "his plummy style echoes emptily.
